Are you a natural for Computer Programming ...and don't know it?

SEND FOR THIS FREE INFORMATIVE BOOKLET AND SAMPLE LESSON

Why don't you prepare for a career in programming? For most of the good trainee jobs, a high school education, a logical mind and the right preparation are all that are required. No machines are involved because a programmer doeshort operate machines. He writes the programs that tell the computers what to do.

Instead of worrying about how long your present job is going to last, you can plan for a bigger future in the field where the jobs are. Continuing expension in the years ahead may result in more openings for computer programmers than there will be people to fill them!

Right now, without leaving your present job, you can prepare for a trainee position in computer programming. A position that may open up may opportunities for you—in the exciting world of tomorrow. You can study computer programming with LaSalle ast home, in your spare time. Experienced LaSalle instructors will teach you by mail—correct and grade your lesson assignments. You will receive basic instruction in the nature, hardware, vocabulary, equipment and techniques of computer programming.

Programmers are to be found in many types of business—in manufacturing, banks, department utores, communications, transportation, utilities. Trainess begin at good pay, and with the right background and experience can rise to fill supervisory positions at upper-level salaries.

To see if you're a natural as a programmer, send for free sample leason and fascinaring booklet "Beginning Your Career in Computer Programing." In simple, non-technical language this booklet tells you what computer programming what the programmer does; and how you can get your basic training in your spare time. LaSalle, 417 S. Your Dreams Can Become a Reality with your own Duraclean Franchise

Hundreds of men—previously working for salaries or wages now enjoy greatly increased incomes, personal independence, and secure futures as owners of their own businesses under the Duraclean Franchise

Unthinking men may tell you that the day is past when an individual can build a successful business of his own. The fact is that Franchising has opened a wonderful new Franchising has opened a wonderful new Transhing has opened a wonderful new Transhing and past of the property of the corner druggiet have succumbed to the gigantic chains. But, in their place an exciting new kind of business abounds with big profit opportunities for the individual profit opportunities.

For twenty years the "service industry" has been growing with finatastic speed, the the chains have the retail store business. Even a small business providing an unusual service can bring profits to the individual service can bring profits to the individual that were unheard of in the old days. And, unlike the chains, the service business today, is thriving under Franchising.

What is the difference? Just this: A chain is a large number of atows in a chain all operating under the same plan; under the same well-known name; but are owned by widned uses the same well-known name; but are owned by vidual uses tested and proven plans for starting his business and building it; he operates under a Nationally Advortised and well-known name, he has step by step guid-axee but he owner he business. It is enjoys the known of the business. The control of the business is the same but he owner the business. It is enjoys the known of the business and building the same but he owner the business. It is enjoys the known of the business and the same business are same business.

The Daracless Pranchine is such a business. No store to rent. No fixtures to buy. No. 1997 or ethnological to pay for. No location or experience is needed for success, Men or almost evely educational level have added to the success with the "knowhow" furnished by our Company. They've worked from their homes as all Duraclean Service is given on the premises of the quetomer. In the beginning they've used the family car as all equipment can be carried in the trunk. Their only investment has been a cash outlay of less than a \$1000.

What is Duraclean Service. It is a modern method of cleaning and reviving color and resilience of carpets, rugs, upholstered furniture and auto interiors-a method that has almost unbelievable superiority over the old way of harsh scrubbing with water, strong detergents, and power driven brushes. Tests made by an independent laboratory show that the Duraclean "Absorption Method" removes twice as much dirt and soil removed by machine acrubbing. And, the carpets and upholstery are dry and ready to use a few hours after cleaning. In addition to cleaning and reviving, you have five other equally superior services to increase profits. The improved Duraclean process has proved so superior that Duraclean Services are now available through a world wide organization.

Who are the customers' The finest homes in your community, yoe. But, of equal importance hotels, motels, schools, shops, in the contract of th

If you've ever had a really strong desire to "some day own your own business" the Duraclean Franchise is well worth investigating. We have no salesmen to try to influcate you. The entire Duraclean Opportunity is explained in detail in a 24-page book. This book will be mailed free to any man sincerely interested in a future of security and independence. Just your name and address is all that's needed. Send it today. After reading all the facts, if you decide to take the next step, you can write again and let us know.

We'll help you with financing, with training, with equipment, and with all our years of experience in showing other men how to make their dreams become realities. To invertigate costs nothing and does not place you under the slightest obligation. Is this something you should do for yourself? Today?

YOU and WOMEN

EXCLUSIVE MONTHLY FEATURE

NO DOUBLE TAKES

Q.If during sex play a man sets up mirrors because he says he wants to view a girl in all her naked beauty, how will she react?

A. Most likely she'll turn off sexually. A study by Dr. James E. Ellwood showed that 91 percent said they would react unfavorably fo such a proposal. "Most women," the doctor concluded, "distlike being 'studied' during the act of love."

NONLVIRGIN COURSE

Q. Susan enters college at 18. Are the odds really that great that she will get pregnant before she graduates in four years?

Sex learner

A. They are quite great. Dr. Malcom Potts, writing in Family Planning, estimates that one out of every 10 coeds in the school he studied will become pregnant during the years they attend. That of course is merely considering the girls who actually become pregnant in this era of The Pill and other advanced forms of contraceptives. The number of girls who lose their virginity in college is virtually total—excepting of course those who were non-virgins before reaching college. The average coed, says Dr. Potts, was a virgin when she entered the university. She engaged in her first sexual experience more out of curiosity than real passion or "Some time later she fell in love with a student of about her own age, and they

began having regular intercourse. . she used a tolerably effective method of contraception and three months later obtained the pill . . she plans to marry the boy . . she does not take drugs . . she expects to have children and a secure marriage."

DOLLAR DIFFERENCE

Q.Is Georgia, a \$5 prostitute, likely to be just as good at sex as Jeri, a \$50 call

A. Of course not. As in so many other

Passion package

by German psychologist Heinz Rabnek indicates that while call girls often have an interest in sex, many women who become low-paid prostitutes simply do not. Far fewer call girls are frigid than are lowly prostitutes. In fact, some women become prostitutes because they have so little interest in sex, especially in unusual varieties. "The price tag on the woman in merely an excuse for not engaging in umusual sexual activities. The more prudish prostitute becomes a cheap prostitute precisely to have price as an excuse; in effect, telling the client: 'You are not paying a lot so you cannot demand that much." Given a certain amount of frigidity in the call girl ranks, Rabneck insists studies in German, England and Sweden show that many call girls truly enjoy their work. Another proof of the call girl's superiority at sex: The large majority of call girls eventually marry; many prostitutes do not.

HELPFUL HINT

Q.If a female objects to certain sex practices, will showing her a sex guide in which the activity is favorably treated help to change her attitude?

A. It has a fairly good chance of success. In a survey of 243 men and women by psychologists Thomas Staine and R. E. Casser, 91 percent of the wunen said hey'd never read anything in a sex guide book at which they inded any objection. By comparison, the figure for men drops to 62 percent, "Clearity," the two researchers become the property of the

SWITCH

Q. Alice and Bob have been making it for quite a while and now figure to get married. Charley and Dee are in the same situation, the only difference between Alice and Dee being that Dee is a widow. Both Bob and Charley have been very happy with their premartial sex life. Does either figure to be disappointed after he is married?

Bost in hed

A Charley is far mure fikely than Bob to be disappointed, "Most sexologists," researcher Kenneth Palmer notes, "have noted the abrupt changes that occur in the sex life of a young widow. Uzually when a girl is young he cannot be cut off from regular sex seclisity when her hashand dies. As a result she will often grab desperately for any available man, after what she feels is an adequate period of mourraing. Generally, she will be most uninhibited in her approach to sex, industries she mover permitted her hosshand to enjoy. She may

(Continued on page 54)

Who'd have thought I'd make so much money without going to college?

still have to pinch myself every week when I open my pay envelope-it seems too good to be true!

Especially when I remember how sorry everyone felt for me because I couldn't go on to college with the others in my high school class. "How are you ever going to make it now?" people kept asking me. "Without college, it's a losing battle. Everybody knows that!"

Well, the college boys left for school, and I got my first job.

And it was tough going for a while, I'll admit that—one dull,
routine thing after another. From pumping gas to driving a cab to working on an assembly line in a factory. I worked hard but never "struck it big."

Then I read an announcement like this one about the opportunities in Electronics.

I discovered that, with proper training, I could have my pick of thousands of glamour jobs-in fields like radio and IV broadcasting, automation, computer servicing, or even

And I found out that as you move up the ladder in this booming field of Electronics, you can earn the kind of money that even a college man could be proud of—up to \$5, \$6, \$7 an hour ... \$200, \$250 a week ... \$10,000, \$11,000, even \$12,000 a year!

And - most important - I realized how easy it would be to get the training I needed to break into this great field. The announcement said I could learn everything I needed to know, right at home in my spare time, with a home study course from the Cleveland Institute of Electronics.

Well, to make a long story short, I enrolled with CIE. I found that their courses had taken what seemed like a complicated subject and broken it down into easy steps. Sympathetic instructors sent me letters helping me over the rough spots. I really learned fast. And here I am now, a respected Electronics man-earning so much money I still have to pinch myself.

Thanks to CIE, I don't have to envy the college boys anymore. In fact, there are some that envy me!

Send for 2 FREE BOOKS

This composite story is typical of hundreds told by CIE students who are now enjoying exciting new careers in Electronics.

Most of them decided on their new careers after reading our famous books, "How To Succeed In Electronics," and "How To Get A Commercial FCC License." These books deriow to Get A commercial FAC License. These books de-scribe in detail the many electronics careers open to men with proper training. And they tell which CIE courses will best prepare you for the work you want.

Both books are FREE when you mail the coupon below.

So send for them, and get ready to pinch yourself for not writ-ing to us sooner. CIE, 1776 East 17th Street, Cleveland, Ohio

ENROLL UNDER NEW G.I. BILL - All CIE courses are available under the new G.I. Bill. If you served on active duty since January 21, 1955, or are in service now, check box on card for G.J. Bill information.

Give 'em company

Is it "cruel and unusual punishment" to prevent cons from having sex? John Tarlton, who's locked up in an Atlanta, Ga., Federal pen says it is, and sued to be allowed to love his wife during visiting hours. But w U.S. district court ruled against him....

AN OKLAHOMA JURY RECENTLY SENTENCED A (Continued on page 40)

YOM MOORE PHOUGHT HE HAD DREAM JUB' UNTIL CYCLISTS ATTACKED

SEX RAID OF OUTLAW ANGELS

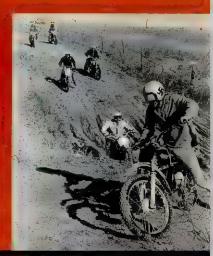

STOOD outside my cycle repair shop in Phoenix, Arizona, and watched the two yams, six station wagons and ten big choppers roar impressively toward the main drag of the city.

"Sissy bikers," said Charlie

TRUE DOUBLELENGTH

When the cycle brutes roared into town, everybody knew there'd be trouble—but no one figured on the rape-and-beating rumble that came next...

KNOCK-DOWN, drag-out browl (tell) began when outlow farters took on Thom Moore and movie company head-on, figuring easy victory—until Moore's cycle gang buddies (above) came barreling into fight

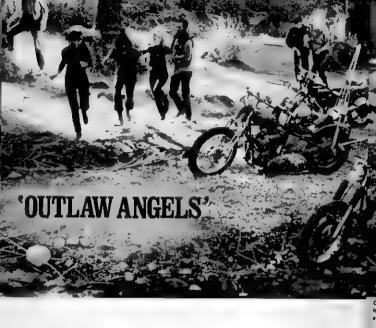

Berry, my head mechanic. "If I ever saw a bunch of sissy hikers."

"Yeah," I said. "They oughta be riding side saddle."

Charlie and a couple of my other boys who'd come outside to watch the event—a real movie

company in a parade through Phoenix—laughed.

"Lots of great-looking chicks, though," said one of them. Then we all went back to work repairing the Harleys, Triumphs, Hondas, BMW's and other cycles in the garage that was becoming much too small for the volume of business I was doing. I needed more space, more up-to-date tools and equipment, and more mechanics. The motorcycle boom was booming along, but the guys who had the money the bankers—wouldn't turn any

of it loose so I could expand, I ran the best repair shop in town, but if I didn't get hold of a few thousand dollars in a hurry, I'd be back working for someone else again.

That's why I got involved with the movie outfit, Walter Anthony Productions, Inc.money. Nice, green, crisp money. And, of course, those girls, the starlets who were

playing in the film.

Walter Anthony Productions was heading out about ten miles from town to begin filming a motorcycle movie about a gang of modern-day rustlers who steal cattle on cycles. This was only a gimmick and the movle played up the usual-fights, chases up and down the highways and plenty of half-naked broads running around and making it with the bikers.

But I didn't know that much about the movie then and didn't imagine that I'd become more involved with the deal than I wanted to be.

A week after we had stood laughing at the "sissy bikers," one of the film company's vans pulls up to my shop and Walter Anthony himself hops out and strides into the cubbyhole I call my office, where I make out bills, sign checks and do my worrying.

Walter Anthony didn't exactly stride, he sort of scuttled, actually, because he's only about five-three and weighs maybe 110 pounds. But when you've got a million dollars in your pocket to make a movie, you can stride if you're only a foot high.

"You are Mr. Thompson Moore," Walter

Anthony said.

"That's me," I said, checking out Walter Anthony. He was dressed, believe it or not, outlaw biker style-denim jacket and Jeans (brand new and creased, sharp creases in the jeans and jacket sleeves), shined engineer boots, denim work shirt and a white cowboy hat. The jacket was decorated with patches, buttons, Iron Crosses and the other junk

CYCLE hoods (as above) are able to live wherever they hoppen to stop on m "run." Tartars were no different, stayed in the desert so they could harass film-mokers . . .

BIGGEST "kick" for outlaws is to find a beautiful "straight" chick who's excited by sex with cyclists . . .

ACTING as "bait," girls (as above) tried to lure bike burns into fight with Apaches, but "teasing" didn't fool them

that the outlaws wear. He was the freakiest thing I'd seen in some time and I wondered what the hell he wanted with me, but I had a vague idea.

He looked up at me with his beady, black eyes and said, "Three of my motorbikes have broken down and you've been recommended to me as the best repairman in town..."

"We're damned busy right now. If you want to leave the bikes I'll have one of my men check them out and let you know when you can have them back."

"But we start shooting an important scene tomorrow and I need all the... bikes on location. I didn't think the horrid things needed to be coddled."

Well, I kept telling Walter that we were too busy to take on any instant-repair jobs, but he's an insistent little cuss, so me and me couple of the guys wheeled the three bikes off the van and took a fast look at them. Two Harleys and a Triumph 750, a brute of a cycle, British. All three were chopped and beautifully customized. Two had burned-out clutches, one had half of the rear wheel spokes either bent or missing altogether, and all three had enough fine dust and gritty sand in everything—a common problem in my part of the country—to grind all their guts down to nothing fit wasn't deaned out. Walter told me they'd been "ridden rather hard" in a big cattler-ustling seene they'd shot with a herd in Texas and there'd been no time to have them looked over and serviced because he was behind in his shooting schedule. Now they weren't running at all.

"What do your other cycles look like? Are they running?" I asked.

"Well, they're running, and that's what I want to talk to you about," Walter answered. "You need a man out there to keep them running, right?"

"Exactly!" said (Continued on page 76)

SAVAGE DINGOES

Last Frontier For Bounty Hunters

Dingo hides earned this Yank bounty hunter \$100 each, but to make a real killing he had to use himself as bait.

Bounty Hunter Tyler

OE Tyler came awake instantly, all his senses alert. He raised his head from the saddle he had used as a pillow, threw off the pround, and reached for the rifle at his side all in one swift motion.

It was a clear night, the sky

was full of stars, and there was a quarter moon to the east. Tyler saw that his partner, Art Westlin, rolled up in a blanket a few feet away, was still asleep. But the two horses, hobbled just beyond Westlin, were pulling at their halters and whimping. Then he heard a sound, several angry snarls (Continued on page 70).

From the New Runaway Bestseller

HAVE always maintained—in fact if has always been one of my prime motivators in writing and talking about sex—that the really advanced fover has only acquired this enviable status because he has taken the trouble to find out not only how his or her own exxual apparatus works, but the functioning of the partner's sexual apparatus as well. It is a logical conclusion, as I think you will agree if you consider it

for a moment or two.

Of course, it is possible for a couple to perform the sex actifall the knowledge they have is that the penis must be put into the vagina and moved backwards and forwards until the man comes, but such coupling cannot by any stretch of the imagination be called making love. Love can only be made if the lovers know that certain parts of the body have to be stimulated to provide a mutually satisfying climax, and not only do they have to know this, but they must know which parts of the body have to be stimulated. In addition, they must know how and when to stimulate schools.

SUZANNE "I have lovers, one after the other-for a month, three months, a couple of weeks. It depends on how good they are in bed . . ."

Editor's Note: A recent scientific survey reported that over one third of American married women between the ages of 22 and 38 have engaged in extramarital relations with at least one man. And over one-half of these wives have "affairs" on a regular basis. They were all fairly typical, "normal" married women who found satisfying sexual liaisons outside their marriages for various reasons. There were many aspects to the survey, but the editors of MALE, rather than bringing to their readers the cold facts and figures, assigned reporter Kevin Burke to interview several of these married women to learn their thoughts and feelings on their extramarital and marital sex lives. The four women we chose from among the 100-odd interviewed are most typical, told the most interesting stories and were most articulate during the interview.

HE first subject, Lois J., is a pretty 26-year-old blonde, has been married for four years and has one child. We held the interview in her home one afternoon while her husband was at work (he is a telephone repairman).

"Sex wasn't the reason I was unfaithful to Jim," Lois said after I'd asked a few unimportant preliminary questions to put her at ease with the tape recorder. "He's good in bed; I have no complaints there. But the two lovers I've had in the past couple of years were good in (Continued on page 84)

LET'S CLEANUR FILTHY, BRUTAL NURSING HOMES

By ARCHER SCANLON

TEAM of female "Nader's Raiders" spent summer of 1970 investigating nursing homes, testified at Congressional hearings about "horrifying" conditions ...

If P.O.W.'s were put in some of the hellholes our aged are kept.

HEY live in prisons, about a million of them, all over the country. Many have been entombed in tiny, cramped, stinking cells for years. They are lifers, most of them. They sit there, just waiting to die. Many of them are drugged, to keep them quiet-and sometimes to speed death.

But they have committed no crime. They are not killers or A.E

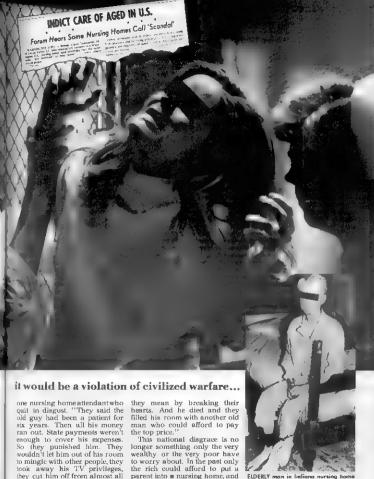

They are the nation's aged: our parents and grandparents. They're rotting away in asylums that are called nursing homes but that don't have enough nurses and don't even have doctors most of the time.

One million Americans, ignored, brutalized, fed garbage that passes for food, administered drugs at the whim of incompetents, victims of medical

experimentation. And all because nobody gives a damn. Politicians pass the buck. Federal agencies leave things up to the state, and the states are controlled by the nursing home industry-by the big businessmen and the fast-buck operators who have turned nursing homes into gold mines at the expense of the prisoners they are destroying.

bight with he will

VOLKSWAGEN

(Continued from year 22)

which he reasoned would be economical to run, rooms enough for a dozen of the tots and mechanically reliable

The job required two hours of his time in the morning for the two loads of children he transported and an equal amount of time in the afternoon Each day he would foe about 28 miles

Harris, of course, was fully aware that the most important aspect of his job was the sufery of the children. Consequently he drove carefully, never exceeding 40 m.p.b. and always stopping at railroad crossings and stop signs.

Yet on that morning Harris had a serious accident in which two children were hilled, five were injured so seriously that they required extensive hospitalization and he suffered internal muries that will keep him an invalid for

the rest of his life.

An intensive investmention into the cause of the accident by the New York State Moror Vehicle Bureau revealed that a sudden gust of wind had blown the Volkswaren off the road, where it hit a soft shoulder and then rolled down a hill The children, with nothing to restrain them, were thrown toward the front of the vehicle at a velocity as great as the speed of the vehicle itself. Their flight stopped when they struck either the windshield or dashboard. Those who received relatively minor injuries were lucky enough to have the impact softened by the bodies of their companions

The official report states Because of its light weight and box-like shape, the Volkswagen Bus is a highly unstable vehicle which is especially susceptible to winds stronger than 30 mph When subjected to these winds the steering becomes erratic, often causing the driver to lose control. In addition, the vehicle has a high center of gravity which makes it especially prone to rollovers once its equilibrium is dissurbed."

The names of the driver of the VW Bus and the nursers school have been changed here because of court action pending as a result of the tragedy. But the findings of the New York State Motor Vehicle Bareau and that of state agerous throughout the nation are real. And in every case, the conclusion is the same this German import is the most dangerous vehicle on the road today.

Ralph Nader, the consumer-protection apecialist who first earned nationwide attention with his book "Unsafe at Any Speed," had this to say about the VW Bus-

It is the most dangerous vehicle on the road today and in my opinion the federal government should force its manufacturer to comply with safety standards."

Nader's opinion is bolstered by a recent study of 270,697 accidents, involving cars of all makes, in North Carolina The study revealed that the driver of a VW Bus is more likely to be killed, or severely injured, than the drivers of allother cars. In fact, only the British-made MG and the

TILL another study of which cars are the most dangerous on our roads was launched by New York State, where 462 000 car accidents were analyzed. The results are eve-opening

In 9.6 percent of the accidents involving small foreign curs, according to the findings, occupants of the small curs were

severely or fatally injured

This compared with rates for Americanbuilt cars ranging from 3.1 percent to 6.4 percent. The lower rate was for regularsized luxury cars and the higher was for small so-called compact vehicles

But when the figures on the large, 2800bound VW Bux were extracted from this study it showed that you simply couldn't formulate a rule saying large cars are the tafest. The VW Bus severe-injury-andfatality rate was an astonishing 12.7 which means that in any category and standard you care to use, it stands out as the most dangerous vehicle on the road in America today.

The most criminal part of the attuation is that the 50,000 VW Buses sold annually here are purchased by those who have targe families. The vehicle holds seven to nine adults or eight to twelve children. As a result it is also used by many school districts and nursery schools looking for economical transportation

John O Moore, coordinator of the Motor Vehicle Safety Program of New Yurk State, has pinpointed the reasons the VW Bus is a death trap. It should be read by everyone who owns one so they will know what they are subjecting their children to.

The main defects of the VW Bus as outlined by Moore are

1. Unequal distribution of weight. Because the motor and trunk are in the rear this means there in very little up front to protect the driver and front-seat occupants. The importance of this is that a saudy of serious accidents reveals that the vast majority of them evolve from head-on collisions. When a VW Bus is hit in the front there is nothing to absorb the energy of the monact

2 High center of gravity. The VW Bus is shaped like a box, thus making it highly susceptible to wind; if can be blown over quite easily. In addition, driving in windy meather makes the steering erratic, complicating the problems of control for the driver. This situation is so serious that the George Waxhington Bridge hans all Buses when the wind is 30 mph or more

3 Older models of the VW Bus do not have safety latches on the doors Considering how susceptible Buses are to stiff winds and how easily it will roll over, the absence of safety latches on the doors is one of its most dameerous features. This means that when a Bus turns over, the doors are likely to spring open and the occupants thrown out

4 Insufficient power. The Bus is a relatively large vehicle, weighing 2,800 pounds Yet, even in the newer models, it has only 60 horsepower. This seriously reduces the margin of safety in situations where it is necessary to accelerate to avoid an accident. The simple procedure of passing another vehicle is even dangerous

in a Bus because its under-powered motor greatly lengthens the time necessary for this maneuver

5 Luck of restraining equipment for pussengers in the rear. In the event of an accident, children sitting in back of the vehicle are pitched forward. What suppoens is that during a crash the front of the car approaches zero velocity but those sitting in the rear are propelled toward the front at the speed of the vehicle at its moment of impact This law of physics results in more severe injuries in the Mus because of its size Rear seat passengers have a greater distance to travel and consequently receive greater injuries.

THE tabeting of the VW Bus as a recoffin on wheels" has not as yet produced any official response, even though the evidence is overwhelming Indiana's Democratic Senator Vance may violate federal safety standards but neither he nor any other lawmaker has done anything about it

What can be done?

The federal government has the power to han all Buses from national highways on the grounds it is "unsafe" Such action would force its German manufacturers to redesign the vehicle to meet American safety standards But what about the many Buses already

on the road! How can we force the owners to do something about them? Obviously, by a massive educational campaign in which the hazards of the Bus are pointed out Owners of these vehicles should be made to understand the dangers they face when they are on the road. All occupants of the Bus, for instance, should be forced to wear seat belts and shoulder harnesses. and it should be against the law for anyone to drive it when wind velocity exceeds 30 m.n.h

In the ocusion of many safety experts the main culprit on our highways today is not the VW Bus, but the Volkswagen miserable safety record and that it also has a relatively few Buses as compared to more than 3,000,000 Volkswagens now in operation in the U.S.

The most damaing indictment of the VW was made by a Cornell University research laboratory. The report stated that VW sedans tended to roll over in accidents, thus increasing the danger of death or injury to its occupants.

Its study covering an analysis of accidents involving VW's at 30 states confirmed earlier findings that the ejection of occupants was the major cause of fatal and serious injuries in highway accidents and that ejections were usually caused by turnovers

"Forty percent of all VW occupants killed and 82 percent of those injured to a dangerous degree were ejected from the

the researchers found Corresponding figures for American-built cars ranged from 20 to 33 percent in fatalities and 9 to 21 percent in dangerous

The report stated that the greatest single safety improvement the VW can effect would be to improve the rollover stability of the vehicle. This could be achieved, the report stated, by a change in the vehicle's

Rainh Nader has also fired broadsides at the hug-like shape of the VW, which is known the world over as the "Beetle. Nader charges that the faults of the VW sedan are similar to the faults of the VW

"Its shape makes it vulnerable to wind gusts, and its weight distribution causes it to roll over easily." Nader has said. "I think it is hard to find a more dangerous

Nader also remarked that VW advertisements "somehow make a virtue of technological stagnation." He was referring to the advertised boast that hardly any changes in body styling are made from year to year.

He also pointed out other areas in which the VW is tacking in safety features, specifically referring to its door latches, its stability on the road and the design of its

rear axle He said the latches did not adequately guard against the tendency of doors to fly

upen in traffic accidents.

He said the car's stability in high-speed highway travel and in turning corners was impaired by the design of its rear unle suspension which makes it difficult for the driver to maintain a steady course on the

The two-part axle, he said, is engineered in such a way that the rear wheels have a tendency to tuck under in turning corners. This is what causes the oversteering.

A S a result of Nader's blast, late-model Volkswagens are now equipped with safety latches on the doors but its beetleshape still remains the same and there has been no change in the design of the rear

The lack of safety of the VW, and the manufacturer's disinclination to do anything about it, has resulted in a number of court actions throughout the U.S. Although none of the lawsuits have been decided as yet they present a real problem to Volkswagen because once one is successful it will obviously encourage anyone who has ever been injured in a VW to launch a suit. The cost of merely defending the company against a mass legal onslaight of this nature has given VW executives nightmares.

Typical of the suits faunched against YW is the one filed on behalf of two women college professors in Pittsburgh. The ladies are asking for \$250,000 and charge VW with selling "defective and hazardous" sedans to the public.

The complaint said that VW ingored results of the Cornell University study which warned that the car's design made it unusually susceptible to rollover

applicants.

The suit, brought by Chilton A. Richardson, 22, and Barbara Jean Clurke, 23, both biology instructors at Chatham College, alleges such an accident occurred in April of 1969, when Miss Richardson was driving Miss Clarke's Volkswagen

The complaint said the car was traveling un a dry, straight road at 50 mph when the right rear wheel suddenly "tucked under." Miss Richardson claims that when she

tried to correct the drag, the car swerved and rolled over twice, causing her to suffer severe head injuries. Miss Clarke alleges she received internal injuries in the same mishan

But suing is hardly the answer to the annual foll of sickening injuries and Volkswagens. The real answer can only come through Congressional action which would force the manufacturer to export a

safe car rous Each year VW sells more than 500,000 vehicles in the U.S., making it by far the company's largest export market. By enforcing a ban on the VW, economic pressure would force Volkswagen to build

safe cars and assembly lines would ston snewing out autos that are death trans-The challenge of the 1970s, if traffic safety experts get their way, will be to reduce by half the number of Americans killed on the highways. This can be achieved only if we apply the same rigid

standards to imports that the experts have proposed for our domestic products. Three American companies are now constructing the world's first "safe" cars. They will be designed to protect occurants in head-on collisions up to 50 m.p.h. and in rollover accidents up to 70 m.p.h. Two of the safety cars will be unveiled in

January, 1972

The need for a safe car becomes apparent when you consider that 450,000 Americans died on our highways in the past decade. Experts at the National Highway Safety Bureau say most of these deaths need not have occurred because we have had the technology to do something about it for years

Congress put the emphasis on safety in 1966 with the passage of the National Traffic and Motor Vehicle Safety Act. The result: 9,000 lives will be saved in

1971 because of design improvement. When all the safety features now being researched are in use, experts believe to complete testing by 1973. Then safety officials will spell out performance standards and Detroit will be given a reasonable amount of time to comply. Only then will attention be paid to the Volkswagen and other small, foreign intports.

While all this gives hope for the future. absolutely nothing is being done to correct the dangerous situation that exists now. And, if one is to hazard a guess based on the nast performance of the government.

nothing will be done. Dr. Kurt Lotz, chairman of the board, announced recently that the prototype would be developed in cooperation with the appropriate American agency and would be designed so that its occupants would not suffer major injuries in head-on

collisions at speeds up to 50 m.p.h. In addition, the planned vehicle will contain devices to substantially improve the VW's stability When would this safety car be put into

recolouring?

Dr. Lotz said he didn't know but promised it would influence the design of future autos manufactured by Volkswagen

"I can assure you," he said at a press conference, "that our cars will meet every safety standard demanded by the riding public

This promise of saler cars in the future does little to alleviate the sorrow of the parents of the children who died in the Kingston crash. Unfortunately nothing can be done about that but something can be done about the children who will be riding our highways tomorrow. Something can and must be done

The situation is so serious that in the time it took you to read this article three Americans have died on the highways and another 280 were seriously injured. The victims and their families suffered more than \$750,000 in financial losses.

The same statistics that make the above

"It is the most dangerous vehicle on the road today... the federal government should force its manufacturer to comply with safety standards."-RALPH NADER

deaths, injuries and financial loss can be reduced by 70 percent What will the "safe" cars look like?

Happily for chrome-loving Americans the physical appearance of the safety cars wun't differ radically from the sleek styles

they are accustomed to

One model, being designed by Franklin Hiller, will feature front and rear humpers built to absorb the shock of collisions; a new braking system with fail-safe features; reinforced paneling to withstand front, rear and side impacts; devices that will prevent the engine from coming into the passenger compartment when an accident occurs; and a periscope for rear vision.

A NOTHER safety car, being developed by AMF. Inc., will have the same essential features, although they may be engineered differently. A third safety car is on General Motors' drawing board.

At this writing the government's goal is

toll a certainty also show that disproportionate number of the vehicles involved in the accidents were Volkswagens. Can we afford to wait until 1980, the proposed deadline for making all car manufacturers adhere to the proposed safety standards? The answer to this question can come only from the American public. If collectively they say we want something done now about VWs, then something will be done. If collectively they say let's ban VWs until they are at least as safe as contemporary American cars, then the VW will be banned.

Nothing can be done about the millions of Volkswagens already in this country. So far as that is concerned all we can do is make each VW owner aware of the danger. Some will trade or junk their Beetles, others will blindly continue to risk their lives

Remember: The next accident you see may be your own.

NURSING HOMES

(Continued from page 37)

of the few city or county old-age homes. But today, with the federal government paying the country's 22,000 nursing homes close to \$2.billion in Medicare payments, more and more American must face the reality that their parents or grandparents are heing showed into prisons that are halfway houses between society and the contesters.

Claire Townsend house what the frap is all about An 18-year-old college freshman, Claire was part of a team of six young women who spent the summer of 1970 investigating norsing homes for consumer advocate Ralph Nader Testifying at a Congressional hearing several months later, she said later, she said

"What we found in our study was borrilying distillusionine, heart-breaking and totally inescusable. The conditions in the narrow borrilying distillusionine conditions in the narrow borrilying county in themselves but, together with the total take of federal Government responsibility in setting high standards and enforcing high standards and enforcing high standards and enforcing in the condition of the same and the condition of the c

Among the inhumane conditions the pals found was a rather common one, described by Catherine Morgan, abo 18, who worked in a narrang home for two days hefore she was forced to quit because it was all such a stomach-wencher. She testified that she found one immate of the home with terrible bedusers on his heels. "They were black with this green oute coming out, and I sweat," the emotionally testified, "I could have study in first into them When I asked a nurse which man had received no medication for heliotors, he just smited and shugged her

EGLECT of that kind is bad enough, but the grim story of our narsing home wandal gues a lot deeper than that. Among the charges made against some nursing homes—but by no means all—is one that amounts to inurder by neglect. There is just no other way to describe it.

A little bit of background first. Some nursing homes specialize in what is called a "life-care contract." Under that kind of contract a man or woman entering a nursing home turns over all his property and money to the nursing home in return for lifetime care in the place. The nursing home operators, by checking actuarial tables and figuring how long the person can be expected to live, based on past experience with people of the same age, stacks everything in his favor so that the law of averages will work to his advantage Some patients may live past the expected age of average death, but others will die earlier than expected. In any case, the operator always makes certain be gets more mones from the patient than the actuarial tables says he should get to break even.

The patient's money, his entire estate, is

now in the bands of a mirrang home operator who stands to profit if the patient dies And, the charge has been mide by many investigators, some narving homes find it financially necessary to rush along the expected natural death by just a little bit. Since more than half of all inmates on any properties are over 15, mention of the properties of the prop

In some cases, the lack of medical care is used to deliberately kill. Despite federal and state regulations, many nursing homes don't have a doctor available at all and medical systs are made every scape of weeks or a month apart. Codds, infections, minus altiments are ignored, and permitted to become major altiments which bring rapid death in the

Even more deliberate in "breaking the heart." Clinical studies' reported in medical and nursing home journals have gone into great detail with each histories on how the elderly lose the will to live if they're not treated like human beings. The studies' suggest ways to reverse the process. But some of the facility the process, they just want to get the patient out of the ways, to "put him out of his

But the misery is instigated by the operator and his staff. The first step is to break a patient's spirit. He is treated like a child, or a caged chimpanzee. His selfrespect is stripped away and his independence destroyed by hitting him with unreasonable rules, such as confirming him to his room, refusing to give him his dessert, forbidding him to take part in activities with other inmutes. Often, he is spanked like a child, teased, threatened with further punishment. And it wears him down. Then, when the spirit is broken and it doesn't take 100 many days in an elderly person who already knew he didn't have much to live for the staff takes " all a step further Other patients are told there is something wrong with this poor guy, they are turned against him, and pretty soon he is totally ostracized. Attendants hold back mail from him, self him his family has decided he no longer exists and won't see him any more He is treated with contempt, despised by everyone. And, when a nursing home succeeds in "breaking his

heart, deterioration and death is rapid.
Another wisdepread killer is the overuse of drugs. In the first place, a nursing
home that may be charging anywhere
from \$400 to \$600 a month (the going
rates in 1970 for minimal services) will
probably charge extra for medicines and
drugs. And the drugs a patient may have
to use a common that the content
of the drugs are that the content
frequency and the state of the drugs and
millions to the nursing home operators'
profits.

BUT the greater tragedy is that drugs are used to control immates, to turn them into zonbies so that these won't be any trouble, and that these drugs are administered by people who don't know anything about them. The fact is that

nursing homes have a great deal of trouble setting nurses to work in them, so that anywhere from 80 to 90 percent of nursing home employees are not nurses but nothing more than untrained attendants. One of the biggest complaints of people who have investigated nursing homes is that there is no control over the use of drugs. A patient who has died or who has left the home usually leaves behind at least a couple of types of drugs, and these are stocked in unsecured cabinets in many nursing homes. They lay around, often without labels, and whenever an attendant feels a patient needs something to quiet him down, a drug is shoved down his throat without a thought of its possible consequence

Many patients die as a result of these unauthorized drug treatments. Doctors who have investigated nursing home conditions in Massachusetts and Illnois have documented scores of unpublicated deaths due to a muse of drugs. But the family never finds out. Death is always listed as from a natural cause, covering up what once more amounts of homisode.

The nursing home industry—and with 25.5 billion is year income it is a big industry—has conned the American public with several mysts. One of them is that all nursing homes or homes for the agad are hereafted, operating in second with very rigid federal and state regulations, and are periodically inspected This is untrue. There's very little inspection group on, by either the federal government of the control of the periodical properties of the states, because nobody cares.

Another myth is that doctora, nurses, or some out of "health learn" is on duly at all times. That is also untire. The wast majority of homes don't have a doctor in attendance and may be unable to reach one for hours. In some proven cases, for days. As for nurses, "there are hardly any around," one director said in disjusts.

And as a final myth, mursing home operators have rised to con the public mitolder to the control of the contr

here emply are no controls in speak of the Department of Health, Education and Welfare issues standards for nursing homes that get federal money, but can't enforce those standards. Which means maring homes do whatever they please It a family or his patient complians about texament in a nursing home this yesting federal funds, the HeW refers it to the count agencies that the text in the first accordance to the control of the country of the state which refers it to the country of the state which refers it to the country of the state which refers it to the country of the state which refers it to the country of the state which refers it to the country of the state which refers it to the country of the state which refers it to the country of the state which is the state of the state which is the state of the state which is the state of the sta

HE results, as we've seen, can be tragic But what we have seen so far is just a small part of the tragedy. Nursing homes are the deadliest places in the country because of the threat of life, the

National Fire Protection Association tays. For elderly neonle, many of whom cannot move without assistance, fire is an especial danger. And nursing homes are worse firetraps than any slum tenement in Harlem or squatter's shack anywhere in

the world

There are about 20,000 nursing and old age homes in the country. And each day there is more than one reported fire -a fire needing the help of the fire department in one of those homes. That is well above the national average for fires in all homes and businesses. In the past decade nursing home fires have increased sharply, killing many hundreds of inmates who were trapped in their prisons. And yet most states refuse to pass laws requiring oursing homes to install automatic sprinkler systems, even though the NFPA says this is the only realistic way of saving the lives of elderly bed-ridden inmates of these homes. The nursing home operators, banding together in a number of associations, have fought all attempts to upgrade fire safety standards and have usually won. "You'll put us out of business," they cry, and government once more demonstrates it has more concern for profit margins than for the lives of its cilizens

The result is just what you'd expect. Back in 1961 consumer groups in Ohio demanded that a state law be passed requiring nursing homes to install automatic sprinklers. The Ohio State Federation of Licensed Nursing Homes sparked the fight against such a law, easily defeating it every time it came up. In 1963, on a cold pre-dawn morning a few days before Thanksgiving, one of three attendants on duty plugged in an electrically heated steam table so that the inmates' breakfast would be ready at 5 a.m. The steam table had shorted out a couple of times in the past, but nothing unusual was noted this morning.

A few minutes before five, one of the attendants noticed, from the lobby, a flash of light outside the main entrance door. She went to investigate and saw a strange flickering light under the eaves, right where the electrical and telephone wires entered the building. She raced to a phone to call the fire department but the phone was dead, the wires burned out by the fastpreading fire. Several people driving past noticed the fire and ran in, telling the attendants to get the patients out. Instead, the attendants and the men grabbed fire extinguishers and tried to put the fire out. They succeeded in extinguishing the fire on the outside of the building, not knowing that it was blazing furiously in the attic, unseen. Someone finally reached the fire department from a phone down the road and reported that the fire seemed to be out.

Before the firemen could arrive, not aware how scrious the fire was, the nursing home began to fill with smoke from the biazing attic fire. The attendants and the passershy began leading patients jut, every single one of the more than 100 patients needing help in escaping because they were either too infirm to get out of bed or too confused by it all. When the fire trucks did arrive, only moments later, the nursing home was a blazing inferno, lighting the sky brighter than the rising

sun. Only 10 minutes after the fire had been discovered, the nursing home was totally enveloped in flames. The firemen could hear old men and women screaming inside but they were helpless against that

raging bell. Many hours later, when the fire was extinguished, all that remained were parts of the concrete block walls, Everything inside the building that could burn had gone up in flames, and the concrete block walls had collapsed inward. Charred bodies were totally beyond identification but the attendants knew who they were-they just had to walk down row after row of collapsed hedsteads and see a body and knew whose it had been from the location of the bod. Sixty-three were dead.

"Impossible," the president of the company that owned the nursing home said. "That building was fireproof

The huilding was of the construction, modern einder block design. but it was far from fireproof as so many nursing home owners have discovered, einder block shells don't stop fires from raging inside. A sprinkler system could have prevented the tragedy, of course, but nursing home operators were against sprinkler systems because they'd cut into profits. And 63 persons died.

HAT was Fitchville, Ohio, 1963. Did anyone learn a lesson out of that fire? Marietta, Ohio, 1970, a nursing home in

a building that failed to meet some safety standards, staffed by people who had never received training in emergency procedures. A flash fire, in the middle of the night, and 32 elderly persons are dead.

The fire situation is a disgrace, a social and political disgrace. It may be impossible to believe, but 20 states don't even require nursing homes to keep fire extinguishers on the premises. Only 22 states require any sort of fire alarm system, and a fire alarm is useless anyway in understaffed nursing homes where nobody is trained in helping patients escape; and even if they were trained there wouldn't be enough of them to evacuate every patient.

State laws on nursing homes are so incredibly lax that they would be laughable, if they didn't result in such tragedy. Nine states set very tough qualifications on who can run and operate nursing homes; the guy has to have a high school diploma! Can you believe that? You better believe it, because nursing homes in those states, and a lot of other states with equally absurd requirements. are run by men who used to be garbage collectors, a few garage mechanics, a couple of building contractors. These jobs hardly qualify them. They're in it for the money, and the money is fantastically good

The nursing home operators continue to kill all attempts to pass laws that would give the inmate a better break, despite years of exposes by writers and reporters all across the country. In February, 1970, for example, the Associated Press printed a series of articles that disclosed:

Doctors seldom examine nursing home patients. In a Topeka, Kansas home about 75 percent of the patients had not been examined by a doctor in the previous six months. In Minnesota, a survey of 100 homes disclosed that the average amount of physician care for each patient was 2 1/2 minutes a week, barely enough to say hello and look at a man's records.

One writer made a three-week inspection tour of nursing homes in several big cities and in one of them found an elderly man tied to his bed by his wrists-"doctor's orders," she told even though state law forbade such restraint. She reported other homes using such restraints, and many of them keeping patients drugged during waking hours so the staff wouldn't have to bother giving them any attention

A national publication conducted a survey of nursing homes and came up with

reports like this:

"In every room, I saw people sitting, most of them simply staring blankly. One old man was lying in a bed, facing a wall. Though it was sunny outdoors, all the rooms were dim. One room smelled of fexes; other rooms of disinfectant. As I passed elderly patients, they merely stared, if they linked up at all."

These are nursing homes, yet they sound the way investigations of snake pits mental asylums -used to sound. That's because the nursing homes are the nation's newest form of snake pit,

Now stick the big toe of your left foot into your right ear."

dungeons for the elderly.

The mistreatment includes what can only be called medical maloractice. Six doctors from a Maine hospital reviewed conditions in several nursing homes for six months. Their professional report indicated how shook up they were at what they uncovered. Two brief case histories will show why

"One patient developed chest pains and vomited. The nursing home administrator did not call the doctor but treated her with laxatives. The nutient died in two days of a

coronary occlusion

"A patient with mental confusion was receiving nine different drugs. When all drugs were cancelled except digitalis, the confusion cleared."

AND Ralph Nader's investigators reported that many doctors used nursing home patients as guinea pigs, administering experimental drugs them. Under federal law and the medical code of ethics, doctors are not permitted to experiment on humans unless the patient has been informed of what the experiment entails and signs a statement that he fully understands and agrees to being a guinea pig. One doctor was asked whether he had his patients' consent, and he produced a release signed with an the patient had been senile for a least three years, was unable even to write his name and could not possibly have known what was going on.

Nursing homes are big business. The huge sums of money paid out by the government under Medicare and Medicaid, new tricky methods of financing the construction of nursing homes, new formulas adopted by Social Security and welfare agencies to pay owners of nursing homes for caring for the elderly, and a complete lack of government interest in adopting strong controls over nursing homes-all add up to huge profits. On Wall Street, nursing homes are among the "hottest" of stocks, mutual funds owning many shares of companies that have jumped into the business and floated public stock issues.

Business Week run un article on nursing homes last year, titled: "Nursing Homes Offer an Investment Lure," And the magazine raves about a marselous financing plan in which several nursing home chains induce doctors to get patients for them by selling a major interest in each home to a group of local doctors.

That's a blatant conflict of interest. A doctor who has a piece of the action is going to want to see his nursing home filled to expacity, and you can be damned sure, even if he is an honorable man, that there is going to be a subconscious temptation to decide in favor of recommending nursing home care for a patient in a borderline case. If the doctor is really greedy and evidence over the years about doctors indicates that too many of them are greedy then he's going to send patients to narving homes who don't belong in them.

One obvious dodge pulled by greedy dictors involves getting around Medicare regulations. Under the rules, a patient cannot get Medicare for nursing home care unless he first spends three days in a

hospital with an illness that requires extensive nursing care. It is well documented that physicians have sent patients into hospitals under phone diagnoses simply to qualify them for pursing homes-and usually the doctor has a piece of the nursing home involved.

More scandalous than the pot of gold the doctors and nursing home operators are reaping through the conflict of interest is the hasic concept of what to do with our elderly people. The fact is that the most thoughtful experts in geriatrics insist that unless a man or woman cannot function without professional supervision-which they seldom get in nursing homes in any case then they would be better off in their own homes. That is mostly because nursing homes, as they've developed, are just a way station on the road to the cemetery. The inmates go into most nursing homes knowing they're going to die in them, and they lose the will to live, losing it a lot faster if the nursing home operator knocks it out of them

As the senior medical fficer in the British Ministry of Health puts it, in condemning America's rush to shunt its

elderly off into these death traps: 'Our philosophy is that old people want to remain at home, in their own house, surrounded by their own possessions, their own memories. That's where we believe they should be, where they feel secure, where they've got confidence. It's tempting to think that it's a matter of institutions and that sort of thing. I think it's rather like condemning old cars to a scrap beap.

N England, and so many other countries, the government pays for the care of the elderly at home, when the elderly are able to remain at home. It sends nurses around to check on their health, pays their support, gets them interested in programs for the elderly and all of it costs a bell of a lot less than the cost of keeping patients in these dungeons

In the meantime, though, what is needed is some fast laws that will make nursing homes come up to the professional level of hospitals. Ralph Nader, in his report to Congress, recommends that nursing

homes receiving federal funds should be immediately forced to come up to established federal standards, which the federal government itself has ignored, that there should be stricter medical review and licensing procedures to get the incompetent and unqualified out of the business, and calls for an immediate federal investigation of all nursing homes.

Nader also urged Congress to look into the development of alternatives to nursing homes, so that the elderly who don't really require specialized care can live a normal life. Alternatives such as subsidized private housing and in-home nursing care. Instead of funnelling \$2 billion a year into nursing homes- a figure that is certain to grow enormously as the number of elderly people in this country increases -we should spend most of that on other ways of caring for our old people, ways that would give them a reason to live instead of relegating them to a junk heap

In the meantime, though, it is obvious that some people require narsing homes in their later years. If you have a relative who must go into a nursing home, this is what the experts say you should look for: Take a trusted doctor or nurse with

you when looking for a home. Make certain thes think the patients are

receiving proper care.

As for level of care, don't sign up for services that will not be needed immediately, but make certain services that are needed or might be needed later are available in the home. Keep a walking patient out of those homes where there are a great many bed-ridden patients.

Make certain your doctor will be able to visit the inmate at any time, without

advance notice

Talk to the other patients in the place. If they're just sitting around, not doing anything, dozing or in a daze, the chances are they're drugged to keep them quiet. Run, don't walk, to the nearest exit.

Have your doctor check on the nursing and medical setup. If there aren't enough nurses, or if doctors aren't immediately available better nursing homes have arrangements with nearby hospitals for immediate doctor services look for another nursing home.

Make certain that visiting hours are liberal, and that the patient will be allowed to make outside trips if he's capable of getting around. A nursing home should be

a home, not a prison

Get a list of fees in writing, in advance. Find out what you're getting for the basic fee and how much all the extras including drugs will cost. Try to get the home to agree to let the family provide the extras. Such as drugs, because buying things outside is cheaper

Before you or the patient sign over any sort of property or make a will in favor of the nursing home, check with a lawyer. Too many life-care contracts are stacked against you, and many of them

are invitations to murder.

Those million prisoners in the nation's nursing homes have been crying for help for years. It's about time somebody listened to them. For they are our parents and our grandparents. And some day they may be one of us you, me, your wife or friend. Let's destroy the trap before too many others get snapped up in it.

STEP UP TO **BIG MONEY!**

Be an Auto Mechanic!

Train at Home in **Your Spare Time!**

Skilled men are desperately needed in the Auto Repairing Field. Over 20,000 must be trained each year. If you are 18 or over and want an exciting, big pay future in this dynamic field, CTI home-training is for you! Get the facts that can put more money in your pockets-fast! Use the coupon to send for the free CTI Book-NOW!

YOU RECEIVE TOOLS AND TESTING INSTRUMENTS TO HELP YOU LEARN FAST!

In addition to easy lessons and work projects, you get (and keep) a set of mechanic's tools and testing instruments that help locate engine and electrical system troubles quickly. You get experience as you train.

"ME TARZAN, YOU JANE, WE BURN"-It was a "standard" torture scene in a "Tarzan" movie. They were filming the action at Rainbow Springs, Florida, for a Spanish movie company making an epic called, "Tarzan and the Rainbow." Tarzan was spread-eagled on the ground, bound to stakes at his hands and feet. Jane was tied to a tree not far away. Prop men had just set the "ring of fire" that would slowly burn its way toward the two of them, when suddenly something went wrong. "An unknown fluid was used to ignite the leaves, ex-plained the deputy sheriff who investigated. "Whatever the substance was, it exploded." Before the rest of the cast and camera crew could rush to their rescue, both Tarzan and Jane were seriously burned in a make-believe torture scene that turned into an unexpectedly horrible reality.

NOBOLY BUSTS THIS BANK—If you think our nuclear systems are secret, there's probably multing in the world more closely guarded than the defense plans for securing Fort Knos, storchouse for America's gold supply. Hundreds of 27th-gound gold bricks are stacked in a 2-story-high steel vault that is embedded in concrete. Each gold brick is worth about \$14,0000, and to get one of them out of the vault, a 20-ton door hus to be cracked. No matter what the movies have led you to believe, nobody his

ever gotten into the vault to photograph it, ever since the 1937 "No Visitors" policy was put into effect.

CALL CIBLS VS. PROSTITUTES
—Worst insult to a call grid is to be
referred to as a "prostitute." When
she reaches the top of the ladder, it
seems she hates to be reminded of
the days she pounded pavements
to pull in a customer, or worked in
a house where the object was to
separate the customer from his
money as fast as possible with as little

w appointment, usualls for the entire

evening and night. In many cases, she's treated like a date-taken to dinner, night club or theater before returning to her or partment for the main event. Then it's an all-night sex session paced to her client's needs and demands, as wild and erotic or as gentle and passive as he requires, with never a "hustle" for additional payment for "extrax."

THE LONG, COLD CRAWL-When an ex-fighter pilot whose small plane erashed in a snowstorm in California around Christmas time said, "I really didn't think I'd make it," here's what he meant. Slammed against Angel's Peak, between San Diego and Paliu Springs, at about the 3500-foot level. the pilot crawled from his plane and took stock. He was bleeding from multiple wounds all over his body, had a brain concussion and discovered that his ankle was broken. Remembering seeing a road just before the crash, he forced himself to erawl in that direction through the raging snowstorm. His idea was to reach the road and flag down a car. since chanches of his being spotted by scarch planes were doubtful. considering the weather. For 33 % hours the battered pilot dragged his bruised body down the mountain until he finally made the road. Just as he thumbed down a passing motorist, his wrecked plane was spotted against the mountain by rescue aircraft. The former Navy Commander, who had served two hitches in Vietnam, reached the hospital in temarkable condition despite his incredible ordeal.

LOVE CAGE

(Continued from page 25)

"Big man," she had said, "you've never satisfied me."

Divoce proceedings rolled smoothly and since Dave was a free man, except that the had to pay a free man, except that for the privilege, the beam dating Gladys for the privilege, the beam dating Gladys from the pean sign company that employed him Gladys a petite bruneste from druw South, had soft, dark eyes and a cute draw! Best of all, she was nothing like Norma.

After a time, it was understood that Dave would begin spending the night in her apartment. The first time, it was satisfactory until the very end. Their bodies writhed together in the darkness and Dave fels himself go with a thundering force. It had been too long, he thought

Then Gladys grew motionless underscath him and doubt pounced at him

in the shadows like a malectors cat.

"What's the matter?" he asked, hands camped on the girl's damp and slippery thigh. He had reached his climas, but Gladys hadn't achieved hers. Almost desperately, he trimit to rouse her for a new

"Not tonight," She stroked his cheek as though be were a child "It isn't your fault, during it's mine," she whispered reassuringh

She doesn't want to hart my forlings.

Days thought

He got up and stalked to the bathroom and spleshed water on his sweaty face "Strikeout number two," he snarled

alond, in disgust
Two days later, Dave and Chuck Wills
went to The Pink Kitten to install the
went to The Pink Kitten to install the
went to The messing Some sign. Six feet
long, with a figure of a topless dancer at
each end of it. At night when the neon
began to flash, the two make-believe
dancers would shake and twist as though
they were cancerting to the frenzied beat of
rock music.

"Have you ever been inside this place?"
Chuck asked as they unloaded the truck
"Aff the girls go topless," he said after
Dave should his head "Not only the
dancers, but the hat check and digneste

girls, too "."
Dave's grin was tight and restrained. He and Chuck put up their ladders and soon they were walking around on the clob's roof. The Pink Kitten's manager wasted the sign installed in the center of the roof so that it could be seen from all directions He atood down below and shouted instructions at Dave and Chuck as they worked, waring to show them where he

wanted the sign placual. "ICH take two days to get this installed the way he wants it," said. Chack cheerfully, "and I don't object a hit. The screen, here is better than at the heach."

"Yeah," said Dave, gazing over his companion's shoulder withe girls who had started to arrive for their evening's work.

Young and hosomy and attractive the girls drove into the employes' parking lot loughing and talking. They showed off

their shapely limbs as they squirmed out of cars and drifted and the club in pairs and threes.

MARRULOUS Chuck looked over the girls and analyzed their assists. He puessed at heir measurements and told. Dave which of them he'd like to be stranded with our a desert island. Oo just in a double leed. "Don't you tike any of them?" he asked our beat of the stranded to the stranded of the stranded to the stranded with our a desert island. Oo just in a double leed. "Don't you tike any of them?" he asked to the stranded to the

"The blonde," Dave said.
She was one of the late arrivale. Tall and
she was one of the late arrivale. Tall and
sports car driven by a redhead with large
breast. Her cheek bines were wide in a
striking face, her eves sultry and sardonic
as she glanced up at Check, who had shid
to the edge of the roof to get a better look
at the beastly parade.

"Don't fall, cowhoy," she called with an amused grin "I'll dive off," responded Chick, "if

you'll promise to sist me at the hospital.
"Men in traction don't interest me," she
countered as she moved out of sight.

Listening to the reparter, the silent Dave wiped sweat from his check with the back of his rawboned hand. He wished be had. Check's ease with strangers, especially morrer.

He remembered the difficulty he'd had talking to Norma before they married. As the time, he had never been involved with a gell like her, not units seas but beight and witty, with two years of college behind her. He had been unable to understand what she saw in him.

When they made love for the first time, when Norma mounted and bit his shoulder and wrapped her legs around him, he had thought he had it figured out Sexual straction. In had, they were made for

each other What a sucker he had been

Dave was 20 years of uge, tall and muscular, with broad shoulders and house and a square-cut face. He pulled down a good salary, but his pay had never been quite enough for Norma, who spent momy as though a fresh batch arrived in the mail each mortung.

For two years Dave had worked overtime at every opportunity and occusionally moonlighted in order to keep horms an the manner to which the asted to grow accusioned. He had known that Norma's extravagance should be curbed, but he forgues her every dualt when he came home and she rubbed that sensual body against him.

some against the control of their marriage. Dave fruity came to his sense and laid down the law Norma had to stop emptying their bank account and using charge Lards at though they were free spending incases. Fewer expensive clothes and no new Lar antil they caught up on their debt., the control of the con

First Norma tried to styly evade his ultimatum and then she started fighting it When she wanted something they couldn't afford, she poutingly refused to go to bed with him until he gase to

with him until he gave in "If don't like this new policy you've got." Dave told her. "Sex on the pay-assou-go plan"

She smiled at him with her eyes muchtingly innocent "I just like sex butter when you've done something to please

What builfighters call the moment of truth came one sight when Norma sensated their Norma's reg. She entered the better than the same of t

IT was a stunning performance on Norma's part. Dave knew that she wanted something. He knew it as well as he knew that a year had 12 months. He told himself that was e-silence of what their marriage had become

Norma coiled against him. Her fingers caressed his thigh and she began to talk of an apartment she had seen that day in a lutter section of town, near some old friends of hers. She'd like to move there, she said.

"So that's your price for a night's entertainment

She laughed softly "Don's get stern with me again"
"We can't afford a mire expensive

She moved her hand. Then she shifted to the other side of the hed, putting distance

and accide silence hetween them
"I don't gajoy bargaining for sex with
me own wife. This has got to come to a

my own wife. This has got to come to a screeching halt. Dave said.

"Or else?" she asked him sarcustically.
"Yeah. Or else."

"I'm going to tell you something, he man." There had been a time when she'd catted him that playfulls. Now her tone of vioce made the words wound like an insuff. The got a right to put a price on it. You don't happen to be the world's greasestover, you have not.

Dave was growing ungrier every second "Is that your suphisticated way of telling me I don't satisfy you in bed?"

"If you think otherwise, it's because I'm a brilliant actress." She bounced to a satting position and threst her face close to Dave's and gritted, "Big mass, you've never satisfied me."

From that point, there was only one direction their marriage could take. The same direction the stock market took in 1929.

Morning came and he sat up before the harm shock dermaded it. Ble found that the blonde was stiff on his mind, the memmay of her arrogant beauty swid and insistent. Because he and Chuck had to attend to a course for emerge, eath first, they didn't get back to The Pink had will alternoon. The stiff had to been writed the stiff of the stiff of the when they hooked up the sign and chicked in on and the garls began their electric.

"You boys did a fame job," he said "Come inside and have a beer on the

Dave realized that he was looking for the blonde. She came through the doorway and their eyes met and she smiled faintly, as thoughts since yesterday promised his thoughts since yesterday.

the club at a quarter post our, arrisf a stream of harrying girls, and she saw him and divided from the rest "I thought

you'd give up and leave. "No chance," said Dave sed opened the

door of his car for her He drove though the night with the weenth of the girl's body close to him

She put her head on his shoulder "I'm bushed. This business takes a lot out of a Dave was siters. He was as tight as a

knot inside and his paims sweated on the wheel

The biumle yawned "I'm half-asteen Luck, you call me on my night off, Phoroday

"I can't wait that long," Dave told her Her hand grazed his thich and ground lanwere his legs. She laughed. "I guess

you can't Well, we'll see what hoppens. When he stopped the car in front of her

system is scopping the car in front of me apartment, Cara beauth back and structud, yawning again Dave turind and put his hand on one of her beauty while her arms were in the air. She pinned his hand and squeezed his tragers into the full soft, mound inside her sweater "Okay Wit's argent, okay, 'she said

She lived on the second floor. She put her key in Dave's pain and while he unlacked the door she stood with her breasts nodging his acm "I put down the

makeout artists who have around the club They have me But you're not their type There's something about you that surns me -n Dave kissed her and her mouth was

warm and most. Her torque sought his Their hodies moved together and her fingers closed tightly on his arms and she wrenched her lips away "I'll take a shower I want to be sure I'm awake." Dave couldn't remember ever having

been this nervous before. He could hear the shower pounding beyond the bathroom door as he sank uneasily onto the couch He asked himself what he was doing hore If he needed a woman, why had he chosen om so much like Norma?

Cara came back into the room. The robe she were was so thin Dave could make out the shape of her hody inside at The curve of her hops was an entireng shadow, her hernets voluptuous and swaying, "Now, left me what she's like "It isn't imperiant."

"Not to me But to you it is." She tapped her index finger playfully against his advance chin "That's past a guess, but I'll bet I'm cub: "

'I don't have a wife Only an ax-wife." Well, I didn't most it by much, did 17"

ME gown was slit provocatively to fur ususer thigh. White flesh gleamed as she moved closer and beaned down to fasten her mouth to Dave's

Extending the kiss, Dave put one hand on Cara's bared thigh, the other on her

'Did she have you, or was it the other was acound?" Size asked blor eyes had nurround and her breathing was faster than before he touched her I didn't come here to talk about bor."

"Or to talk at all," she said, her smile tensine him, 'the stepped away and putled the helt of the robe and spilled e open. The beauty of her naked body binzed at him and he hent forward and clutched her lims at the calves and guided two toward toward She came willingly and he can his hands no her thighs and one leaned against him so thi he could reach her breasts

She was as ready. Dave thought, as a woman could get If he failed to satisfy her, it cornainly would be his fault, we

His mouth grante her breasts and record downward. He thrust his tomase into her navel and she writhed in delight

He knew that it was time for the sea another moment of truth, and or he notuckled his bek, he realized that he was here for that as much as to appeare the mend prodding him.

Cara eyed him, a wisp of a units at the curving corners of her full lips. "I can see one they that wasn't wrong with your

How little she knew, thought Dave, and he was suddenly engor, driven by urgency He entered her quickly but the memod ! have sensed his prove before he made a and was prepared. She widened her thinks and fell back, lifting her knees, and they stepp to in higher a sen with court of a ten

But this was only the beginning, Dave ald himself Norma and always told himself responded passionately, or had appeared to do - he somewhere along the way he had failed to measure up as a lover. Where had that failure come?

"Don't stop," said the girl, although he didn't realize he had, and he gazed into her eyes and saw that the stab of self-doubt wishin him had somehow communicated itself to her

He smiled and thrust deeper and site smiled back and stel lower on the couch and focked her legs about him the was all right again everything was fine

Dave understood now the reason he had huen drawn to Cara it was precisely because she was as much like his ex-wife. so said assured and so knowing about men

She was mounting in passion, lifting her buth a most his thrust and he sen the hoc flush of triumph as she sheeldered and margared buskily, aimost sa apology. can't was any longer, darling. Then he was a supplied an early will her again reaching his own climax as she grabbed a handful of his hair and held on while she garged bothy against his cheek.

YOU AND WOMEN

(Continued from page 8)

well try oral sex for the first time in her life. Others find they are experiencing their first orgasm. In many cases-although of course there are a large number of exceptions-this wild sex drive can stop abruptly on a young widow's remarriage She is very likely III revert to her usual 'murried' pattern of lovemaking."

HOPPED UP?

Q. Eller is a very straight girl who won't touch drugs in any form, while Fran is big on trying almost anything Does this interest in drugs indicate that Fran would also be more interested in sex and probably better at it?

A. Hardly, Ellen, by all odds, would probably he more adept at sex. Fran may well be a "sexual incompetent." Many young people are taking drugs as "sex substitutes," according to Dr. Thaddeus Mann of Cambridge Univ. in England. Writing on "Sex, Drugs and Ethics," in a United Nations publication, he links drug-taking with "sexual incompetence," "As with opintes, cannabis (marijuana) and LSD," he writes, "there is some evidence of a link between the abuse of amphetamines and certain types of sexual incompetence or deviation . . . Young people frequently seem to indulge in drugs for their prenamed pleasure-giving properties and in the hope, however ill-founded, of prolonging sexual gratification. To them the drugs serve as sex substitutes. Up to a point this also applies to older men, particularly those suffering from impotence, imaginary or real, due to aging."

OVERDUE

Q.Sally has been sleeping with Vic for about six months while I'ma has had the same arrangement with Walt for about a year and w half. Buth girls suddenly put marriage pressure on their men They both say they will break off the relationship unless a marriage date is set Does Vic or Walt have more to worry about?

A. Vic. does. Watt's relationship with Finn has passed what sexologists call the rini nas passes what secondates call the critical marriage deadline" for couples sleeping together regularly. Fina has probably been sleeping with Walt too long to break off with him, otherwise she would have done so a long time carlies "Generally speaking," says sexulogist Virginia Peters, "such a girl will demand marriage after about six or eight months. If she does not for another year, or does 54

and is talked out of it by the man, she probably can continually be talked out of it." According to the Peters thesis, Vic is facing the critical deadline. Sally has issued a warning, and she may well stick to her terms-unless at heart she is just another Tina

MAKE-UP TIME

Q. Is a smart for a husband to tru sex with his wife after an argument?

A. Most wives don't think so. Eleanor Hamilton, Ph.D., tells one wife's comment: "He starts criticizing me the moment III gets in the house, and then he expects me to feel loving and sexy (en min-

Ecstasy encuse

utes later. You just don't feel serv sexv when you've been told what an idiot you are." Other sexologists warn that since the sex act is more emotional for women and more physical for men, wives can resent the intrusion of sex right after an argument. The husband who puts off sex until the following night generally has allowed for the proper cooling-off period.

TAINTED CLUE

Q. Does the fact that a girl bleeds during intercourse prove that she has been u virgin?

A. Not necessarily. It could be either "blind back" or sharp cunning on her part. Dr. LeMon Clark observes " at least 30 percent of all young women have no pain or bleeding at first intercourse and , the man could not know whether the hymen was intact or not. The hymen is so rudimentary and elastic that it causes no frouble. Some women, too, have a hymen reconstructed if they can find a surgeon to do this simple procedure."

WAS right about you, she told him 'I just knew you'd be great | glad we the point." She wound her fingers his hair again and pulled his mouth back to with the second form the trouble with Norma had to hed He picked up the girl and carried her to Not once did Norma or 48 his mind

are an artist or not, it is a most for

dismare

"Orgies are things of the mind," said "You can get the most Munte Peritanical person in on one if the appeal s right. You see, part of my psychistric study is to see how much real abnormales there is in being unrestrained. I was, in the sume that you don't know, brought up by wary strict parents. You don't believe? "I don't believe-not with your cute

fiethe lumbits "All right, then let's go to just one more ergy in order to prove my theury. Most of

the people will hardly be aware of the intention of the host; and then, my dear

lower, you will see some organise revelations Are you tired of it?" "I'm tired was I'm tired of late nights and little sleep. Further, I'm not doing too much work on my book. All right, we'll go to just one more orgy and then I must finish my book on impressionist painting When is this surprise orgy taking place? "Tonight, my dear wethor," spid

Maggie with a sewd lough "Mon Dies! Doesn't one must a fiethe bit of preparation?" I said, as if 9 was trying

to bug off. "In Paris a man is always prepared for another glass of west, and another mosters That's part of our egalite-no?"

The party was in Neuilly, so rich with things past and current. It looked like an average relaxed source with a few female singers, some lawyers, and some aftists who had made their money by painting all the expected things over and over again it was a mixed grill of proper people, with hedy schoolteachers bringing up some inter-day moral affirmations teachers looked prim, hardly capable of Maggin's organistic revelations

A girl was at the piano playing a rondo Soon she was joined by a sanger who tauk her through an arts of Mozart's from Don Giovanni It was one of the leatur arios, and I wondered if that had any symbolical

signaticance

Somehody no doubt, must be in on the proceedings coming up but who was it besides the host? There was no hostess. And the host, a thin man with a thin bused that is now popular in Paris, hardly looked like a man who went in for orgies if he nept to for anything, a was for clipping COMPURS

The aris ended A small girl, obviously Indochimose, now went forward. She did a few lovely Indian dances, using the most period head movements; much as if her head was not suchored to her siender shoulders. She was heavily applauded

Another pointst came up to the piono and played a Russian Cossuck dance from a sation's habit. And soon a man wer whicking and leaping with fallucious grace and energy

"Some orgy," I managed to say to Muggie "It's either the wrong house or the wrong night Shall we go?

that it was the right house and the right

might A girl, who hardly knew the difference butween a rondo and an aris, now came forward. She talked quickly She said, with some quaint indifference, "I am a noturalist. I have clothes inside of a house, and this is such a presty house. I usually take all of my chithes off at the first scrapped by nature. She was a great animal

buckoning opportunity if it displanes anyone, please forgive me. I do, as a matter of fact, have the permission of our and she nodded to the thin man He smiled back, adding just a slight

mystique to his smile

" med So, voila, here I am, nude . . with that everything fell from her. She had stripped faster than a stripper who'd had a les drinks. She was down to her shows She was a redhead, rather large of both with metful breasts and a full derviore

Side took a gioss of champages that someone offered her, and, without saving amorber word often on down or the pratriand placed Value Trices to illustrate her companies most

No one had said a word. Three of the women glared. The men, mostly, were quite amused by a sudden display of gracious multi. She was much too setractive to offend any but the three glaring number

came forward. She said nothing She merely took off her languistis and her will postaloons. Her red bra came away and

"Could you assure a heatermoon suite Tongyan dilu

then her red parties. She was so small that her breasts were more simples than real breasts-- but she was as lovely as a heautiful child. And she, too, sat down at

Now the singer who had more the aria from Bon Giovanni came forward. She said "There is a scene from an opera wherein the woman stabs herself. May 6, ladies and pentlemen, do the scene as I have always imagined it?

I did not remember the aria, but it was in the great tradition of the Italian school The singer was quite buxons, full-hipped and large-breasted; but all of her was in

majestic proportions She undressed slowly. She had majesty to her movements and calculated, harden energy in her body. It was a lavish body, completely Brunhildian She made some of the men guop with the shuer feminants of her corneliness. Her nipples stuck up like half dollars. Her belly, soft and round, had an ample belly button that turned inward with erotic insowciance. Her durriere was gaspingly handsome. She had, I was thinking, certainly been

of a female about to do an aria

She sang and was accompanied by the erl who had first undressed The Indochinese girl attempted to visualize the tragic mances with a dance; but it was not her style. And the operatic singer, in full rosce, was lamenting for the loss of love

it was a concert of high and low notes, with the singer's body and face going screne for a moment and then quickly changing to heart-draining facial expressions. It was hove and Life. And it was Death, at the end.

It came within five minutes and with a final burst. The area ended as the senger lelt, stubbed by the papier-mache knife stewas solding

leadly expected 20 She lay serviation to all of her and Maggie went for her

It was a lephian act. that, then Mugnic was capable of anything, she later said And it was the first time for the singer, said Maggie, who was like Mother Earth Maggie had given in to temptation and wanted the singer's pussions, her voice and her body. And so she turned temporary lesbian, before 20 guspong but titilizand men and women

After that, those who were still too priest, departed while the rest understand The men went for the women and the women went for the men it was a bacchanal of the senses, without restraints sed in total abandon. And it proved what Magaze had said regarding the revelations the innocent at heart suddenly abundoning their iphibitions

The heart of the orgy is Parisian, for Paris is a natural teacher of lechery. It can come in various ways, even with the Friday bath at the public baths. It takes place in the double compactment at the public baths Schoolgirls, who can't get into a hotel, go to the public balks with their bestriends. You soup my back, and I'll do something for you in the cabine double

It has become a game, and some of the male and female attendants play at it too Two boys and two girls will take separate cabine doubles. When the attendant is not looking, they mass together in one tight cabine which may have a tub with the shower There, to the sound of running mater, they disport They bathe each other They fornicate in varied ways They expand, making a Japanese purty in one large tab. They learn fiquid techniques in tubs and under the showers and after an hour they are certainly familiar with each other's natural state

One man, an activit has been meeting another man's wife for ion years in a , abine double. Since it save- money and is much cheaper than a hotel, it's nice to know that even if you don't need a bath. you can have one with a lovely lady and have her at the same time

"You wash my back and I'll find something clee to do. Can you pick up the

suga, durling?

And so this is Paris in its organia: settings. It is give and take funny and wetty, said and decadent, and as fleshs as the Romans were a few thousand years ago. It it proves anything it shows that men and women, obviously circumspect, are hardly the moral creatures they appear to be, especially in Paris After Dark, " a "

CMG6-71

WHEELS OOO DEALS

By HAP BURNS

HOW GOOD ARE those new "scientific" auto diagratic clinics that are musbrooming around the remark? By visiting one, does a car owner have the right is select reasonably sure that the 11 then be able to get his car properly repaired? If a test made his the American Auto Texting Association is any indirection, the answer has to be, "No." For after visiting three of these clinics, the AATA reported "Parts found defective in one clinic were declared in perfect order in another. What's more, all those parts which we were told needed to be repaired or replaced were later checked out. And to may a tonishment, we found that each and every one of these parts was in good working order."

BIKINI-CLAD BEAUTIES who purity gas at service stations, long a popular girmuck in Europe, may thow up in the U.S. shortly. One of the major American oil companies is considering introducing the idea here this summer.

AVIS RENT-A-CAR plans to have nine all-electric cars available for restal by the end of this year, with

the first one making its appearnace in New York City any day now. Called the Transit III, the all-electric cur is a four-passenger vehicle built on a Furd Brunco chassis. It has a 100-mile range. can cruise at 40 mph, and has conventional lead-acid batteries. CAR TREFT NOTES: Nearly une million cars were stolen in the U.S.A. in 1970, up from 872,000 in 1969, and 775,000 in 1968. . . . Almost 80% of all cars stalen were swiped by kids who wanted to go joy riding, the remainder by professionals. The car that is the first choice of professional thieves, according

to statistics compiled by the Federal government, is the Chevrolet Impain. The reason: It's the easiest one to neddle.

BEWARE OF CARS that have passed their filth birthay, in the U.S.A., 1000 free-vers-old cars were checked out in a recent study, and it was found that 90% of them had dangerous defects. In Germany, in another study, it was discovered that cars made over the years ago were responsible for 60% of all accidents that were due to technical failures.

America this year for the first time in our history. There are two major reasons given for the expected sales buom: The pent-up demand caused by the General Motors strike late in 1970, and the pickup in history that is till enjoy on

basiness that is still going on. CRUSADER RALPH NADER, the man who gives ORTISADER RALPH NADER, the man who gives ORTISADER RALPH NADER, the man who gives Detroit big-wigs nighteners, has authored a book that so lead to a new or in the same of the fature. For it deals in large part with what the owner of a new car can legally do if he gets stack with a lemon. The book is wirefulated for publications some time this vear, and will sell for less than there backs as a paperhack manual. Nader plants to continually update the manual (which had not been given a title as of this writing in order to keep II always of the changing time).

THAT UNEXPECTED problem Vega owners were basing at car washes has now been remedied. The problem was that the Vega wouldn't fit through car washes because it was too low. But Obstrolet eagineers fixed things by clipping the ends off bolts.

holding the rear shock absorbers, and he mulifying the exhaust

system.
WHAT'S NEW: An "Auto Emergence Kit" for highwas errecgencies. FLIGHT 980

(Cupylmum) from page 80)

our is -- the angry Caribboon, observed up by a storm that had dogged Fegfrt 980 since about an hour out of New York's Keenedy Airport It was a ----one ma, asserted by 16-foot-high waves

It was 3:15 on the afternoon of May 2, 1970 The plane, the Carib Queen, was 35 remotes into hocause the storm and hotel it bank, forcing the pilot to divert to Son Juan for a while But now they were above St Moorten because the tower had said the weather had lifted enough for a landing and there was no seed to divert to fine Juan. They had been flying for four hours and one minute and they had only enough fuel for another 33 minutes at most, and timy couldn't even spot time nicfield

"I think I me somothing," ffart shouted, "Off to the north." The rass had stackened a bit and the orew could me lights off the starboard were

"There's the runway," Four said
"Too far north," De Witt said "Flave to
make another approach." He hepen to sircle the field, to come in again and try to line up with the wenter marker and the rarrway lights. As he was banking the small jet the radio saddenly crackled. "We have you in sight," the man in the control Inche you wish."

Co-pilot Herry Evan neknowiniged "A reading on the westiser, please," he managed The raphy barnly made it over the storm's interference: "Two- to themmile visibility and one thousand foot uniting Even smiled That reading was clearly nonemer Tim over didn't have that kind of visibility where they were, at OUD feet.

And on the around, witnesses would laser say, it was obvious that the mon in the control tower were seeing things no one else could see bucause visibility was practically zero. The lives of 63 possessed the plane depended on good visibility, and the crew couldn't see more than a few hundred feet. But there was no autiety among the orew, as yet. They did not know that the Carib Queen's time was

inning out. DeWitt made another pass at the runway, trying to line up with the visual approach ments. The jet came in at 150 knets, sinking slowly toward the concrete ribbon below "Looks like we're going to he all right," De Witt said Stowly, the ship sortled toward earth -- and then suddenly it goined speed Caught by the wind, the plane oversites the field

HE cupture current softly. A technical, something else the tower didn't seem to im aware of "Let's try - again," DeWitt said "We'll drop about 20 knets from our air speed to neutraling that tailwind.

He circled for the third teme now. watching that angry sou, worrying owe the outmoded Juliana Airport - set's equipped to hardly on instrument hading. "Fd rather touch down in their bay their on their or field," DeWist around Ha couldn't knew how praphatic those wants would prove

Once more the amult ort came in toward the runway, its appeal flows at 120 knets, its flops full down to give it as much sink no mossible. "Lunks good," Evan said "Dioc and standy new." Gently, down toward the sliver of concrete, closer and clower to safety-and then a strong goat of wied reared up, got in under the flags. lifting the plane, holding down the sink rate. Two hundred feet from the runway, 150 feet, and the wind wouldn't let go, and now a hundred feet—and DeWitt putled back on the controls, lifting the nour up toward the sky again, forced to about his

lacating once more.

"How the half can we hand if we can't
me the runway?" Even asked
"We can't," DeWitt saw "I'm going for an alternate," Even and Fact resided agreement. It was clearly impossible to make a safe landing at St. Maarten. The only thing to do was bond for another sirfield, one that wasn't so dangerous.

De Witt snapped on his radio transmitter "Will attempt lending as it Thomas," he provied "Unable to land on year field." The tower acknowledged, and DeWitt put his slaw sato a gentle climb to higher altitudes, where feel desen't intreas foot as at sea luvel.

St. Thomas, in the Yingin felands, is 130 miles west of St. Maarten. DeWist was catculating quickly 3600 pounds of foot left. Figuring the engines gulped roughly 100 pounds a minute, that meant the plane had about 38 minutes of life, enough to reach III Thomas with about 10 stureton to space. Cutting it close, but nothing to get really worried about.

"Oh, my God!" Hurt shouted, the Win turned to see what the trouble was "We only have 650 pounds of fact!" Hert oried DeWitt and Even looked quickly at the gauge, knowing that \$50 passeds meant the plane con't have enough fund to make it to any acport, anywhere, that it had pone beyond the point of no roturn and

As they stered ill the furl genge, the nondie bagan to apen, out of control Horrified, the orewines watched the for altitude Every time it hit 35% it started bouncing and jiggling back up again, and when it hit 1800 denoed back down.

Captain De Wist tore his eyes from the needle "We're okay," he reasoured his crow sunstants, "Probably just the augin of climb and the rough weather has knooked it out of kilter She'd stabiline when we reach altitude and level off. There can't be less than 2000 possels as the tunks No way at all to have be-

that DeWist wasn't so sure. He had read 3000 pounds of fael in the tanks over \$6 Maarten, and by now he shouldn't have burned up more than 1500 pounds. That would have about 2300 pounds. The pauges could be wrong. They've been wrong before. But if they were right, then the Carib Queen and the 63 proprie abouted regrad arrests in exer

et's play et safe," Maet suid "Tuka the middle rending, 1350 pounds."
"Right," De Witt soid. "That remain we

have enough to make it to it. Croix as as

ulterente. St. Cenix, 30 miles elouer time In. Thomas, was the only possible lumbing finid they could make if the funi was as low os 1350 pounds.

that only if there was indust 1300 possession of said in the tacket.

It was now 3:36 p.m., as they continued to climb, four bours and 22 mamotos after areng off from Kunnedy The Carrie Queen had hold enough fuel for four hours and 34 minutes of flying Twoler minutes but Cutting it awfully close

"Request charasses for St. Crain," Captain DeWist said, advising the tower of his change in plans. The ground controller neve him an etray and past as in sticked off, the income feet puring suddenly stabilized. The crow grapus.—850 pounds! If the gauge was right, the DC-9 lead hurned 2 lot more fuel than it should have. and the Carib Quoen would never make a anywhere, except into that brutal ma-Slowly, the clock was ticking out

DeWitt apoke into the transmitter again, caimly, not panicking, unable to really believe his find was aiment enhanted. "Appear low on fine," he told the tower at San Juan, the area's mayor air traffic centrel center. "Reseast characte to 12,000 feet." It was immediately greated and DeWitt mread the place slowly upward, trying to gain aftitude and

And now the pange began to fail At 7000 fact it read between 400 and 500 pounds of fool-four to five minutes life putters or reserved to the remaining As the plane approached 8000 feet a real light blooked on, a terrifying agnol—the out pressure light, warning

that the fuel tanks were running dry,
"That's it," DeWist said. There could
me tomor be any doubt. The Carib Camer was poing to our ay ir tim see

It was 3:40 p.m., only eight minima eway from the teme the crew had mtimated, back at Konnedy Airport, that the plane would run out of finel. It looked as if that astomate would be right on the

"Son Juan," DeWitt cellul "Plight 980 There is a possibility that I might have to disch this siroraft. I am now discussing to the water."
Only a few mission left, five or night at

the very most, before the Carib Queen would become the first passenger jet airliner in history to ever make a deliberate controlled disching at our.

HF doubt Hight of the Corn Queen had started off rentients in New York enrier that morning: Captain DeWitt and his crew had arrived shortly before 5 a.m. at the operations deak of Oversees National Airways, a nonschaduled airline that was leaving its plant and crew to 2 subsidiary of KLM the guest Dutch errors, for a twice-weekly, over-thecolculated the first moded for the stretch BC-9, the jet with the two engines mounted on the roor tail assembly. The arew know that the 1850 miles from Monnedy to Juliana Airport was close to the absolute limit of the small plane's ormsing spood, but it wasn't anything to warry about because they could routisely map at Inemusia to refuel if wind and weather conditions turned out to be

THREE HEADS OF HAIR... where little or none grew before!

THANKS TO THE BRANDENFELS HOME SYSTEM!

Here are those of the thousands of men. somen and children who have told Carl Brandenfels of the benefits chanined through home use of his formulas and massage ourter. In all the certified reports total more then 25 000 (CFA-sudited) and tell of one or more of these wently.

- ✓ Renowed Hoir Grawth
- ✓ Loss Expossive Heir Foll
- ✓ Belief from Dendruff Scole ✓ Improved Scotp Conditions
- If you are losing your hair or are baid, us can take home from the heartwarming season of those three man. Their results

show areas that even where there is no being on the scalp, the ruots (or follicles) may be mill slive-in many cases lacking only the proper stimulation to bring them back into production

While results may vary with individuals horauge of systemic differences, general health and localized scalp conditions. The Brundenfels Home Plan dues offer real and tongible prospects of success in a substantial proportion of cases. Photographs on this new show exert conditions of heir growth when the pictures were taken. They are and manufactured.

USE AT HOME The Brandonfels Senten is used in the pro-

vice of your own home without expensive office calls. The formulas and massage are pleasant and easy to use, and your scalp piways feels so-o-a good afterwards

If you ur anyone in your family, have alsunds become held, or are losing heir, you owe it to vourself and your friends to send today for a five-week supply of Brandonfels Applications with complete easy-to-follow directions for use and for the special manner.

nofeverable that all reports indicated the menther would be purfact and winds at the Curin Oncen's tail

the 11 a.m. the last of the 57 passengers had put out their engarattes and sampund on their mot bots after being usboard abound by the three cabin crow members—Stewardess Margaret Abraham, a pretty bramute who was planning to be married the sext mosts, becser Wilfred Spencer, and Seeward **Fobius Cordeiro**

The Carin Queen lifted off Runway 13 at exactly 11:14. As the jet climbed into the skies above tong Island, heading into the Atlantic, DeWitt noted that he had 26.450 yourses of fuel after takeoff, more than the safety margin required by the Federal Aviation Agency and his airline Rapidly, the Carib Queen climbed to sto assigned altitude of 29,000 feet

As the plane hore south, Hart checked in with Air Traffic Control at each mandatory checkpoint on the route Checkpoint funt at 11:37, Checkpoint Roy at 12:03 and Checkpoint Landry at 12:43

At Landry, conditions began to change rapidly. The turbulence gren worse acthis flew and now they were being haffeted by hard winds instead of hopedfor tailwisshs

"Don't want to go above the weather," the Witt said "It's possible the turbulence w worse higher up, and besides we'll burn too much fuel clienhing above a all.

Hurt radiood in from their checkpoint, Grant, at 2:02 p.m. The phase was behind schedule, but everything had hum normal so far; there was still nothing to weery about They reached Guava Chackpoint at 2:24, with about 8600 pended of fuel inft DeWitt legan to calculate quickly "We'll make St Muscles with about 6000 pounds of fuel inft, 'he said "That's safe a wang

in the passenger cabia, the purme announced they would be landing at \$6 Maarten at about 3:00 p.m., some 20 minutes late because of weather. The seat belt signs went on at about 2:30 as DeWitt ant clearance from traffic control at San Juan to proceed for St. Maarten and dissound to 10,000 feet on his approach

as DeWitt started his descent from 25,000 to 10,600 feet, about 15 minuses away from Sc. Muarten, Sun Juan radiood an urgent message stating that he could not land at St. Maarten because of heavy rain, and to try Sun Juan instead But us he turned for Sun Juan, he received a mound message from St. Maurten that it was now all right to land there. He decided on St. Maacten, reasoning that even if the weather proved deceptive, he had sufficient fuel to "hold" over St. Mainten until of cleared enough to land

It was now 2:57 DeWitt went down to 10.000, swame his ship to its right for it white to avoid any other inbound traffic to St Maarten, and descended to 6000 feet ble flew through the heavy rain and incated Juliusa Airport - only to discover after making four attempts that he couldn't possibly land because the weather had almost completely social in the field

growing more omenous with every passing second. Out in the passenger cabin the fil men, women and children were bissfully panware of the danger they were in. Only a couple of them even realized the point had been forced to abort his landing at \$0. Misseten, and wore hoginning to feel seems about it all Our of them was Arthur Johnson, sitting with his wife astridehips A former pilot himself, Johnson had recognized St. Manries when the Carib Quotn was trying to land, and he knew from where he sat that wenther conditions were atrocross and that the temor should never have advised the crew to try to make it Another passenger, Janisth Bryan, who owns a hotel on the island, knew the plane was clerrhing away from the liny speck in the Caribbean and she seroud there was trouble in store that ment of the other passengers were in total darkness

So were the cabin onew members. The public address system from the cockpit to the cabin was broken, and no public announcement was made that they were ong to dirch Captain DeWitt rang the tell to summion the steward Wilfred Spencer, the purser, horrisol sets the cackput

What's up?" he neked "We may have to disch," Da Witt told him "We're low on fuel

"Shall I inform the passessure?" "Ge aband," DeWitt said. Spencer hurried down the nisks to the rene of the cabin, signalling Cordnico and fillies Abraham to follow him "We have an emergency situation," he said "The coptain says we may have to disch I'm

informing the passempers to get ready." Picking up the mike, Spencer told the passengers that the plane ma- he forced to make an amorpency landing. Please don your life vests." he said 'As a precaution, it would be hest if everyone put on his life most. There is a west under each mo-

DaWs blinked the nest belt and "No lights several turns to Sexoleine emphasize the warning to the passengers But because his reference was not working he could not himself get it worses that they were as trouble, and many of the passengers never got a feeling of urgency about the situation. Mans of them were standing in the side, cansally beloing each

other find life behs and put them on Pinct, the mavigator, harried into the cabin as the plane came down through 2000 feat, ordered by DaWjet to claud: that the ditching proporations were moving unickly enough

"Are they ready for the water?" Hart noked the steward "They are," the steward recited. Hart then rushed back to the cocknit to hele DeWitt and Evan with the last minute ditch procedures. As the plane came down to 1200 feet, they sported the ocean white water with waves at least eight fort high and realts coming from every direction

At 500 feet Even was finishing up amergency ditching procedures, depressorizing the colon to prevent an autward explosion when the plane hit, shutting off the air conditioning, turning on emergency power for best minute use of the plane's controls. DeWitt had already connected alt the fuel tanks together and turned on special bounter pumps-to mich up every last ounce of fuel

Everything was ready as the plans came to about 25 feet above the surface of the violent sea. The red emergency fuel lights come un, then kicked out-not an ourse of fuel left, meaning the engenex would flame out and die in a moment. DeWitt instantly went to full flaps down until mounds later flameout occurred

It was 3:49, a small spot in the see about 30 miles east of St. Croix, and the Corth Queen was gliding along without power at a speed of about 30 knots

There was no time to warn the passengers that a rusk was imminent, no emercem to convey the warning. The job hit the waves with tremendous force, skinned once above a hope wave, come down mean and skipped up ence more. and then finally smushed down for good

In the passenger cabin, some people were still standing, and others were setting in their acuts without having strapped their mits. Only a few air-wide passengers. braced thomselves for the crash, head down on knoes. Mort had returned to the gulley at the last moments, helping Sonscer and Cordeirs with last monute distails, and were on their feet as the son rushed up to the plane. In the last motant Mort spotted the crash coming and should "Nic down! Sit down!" Plant and Simencer leagued into the craw mats in the naltey and Cordeiro braced himself mannest the life raft that he had not pulled suc of a galley cabinet

that Margaret Abcaham and more than a dozen of her passengers were not so fortunate She was standing, helping an eitherly couple get into life vests, when the plane smashed into the waves. She and the counte were thrown to the floor and bodies immediately piled up on them-hodies of other passengers who had been standing

At impact the set langue to fill with water that came in through cracks which opened in the fo-elage. The crew and passengers logan scrambling to get out. Up forward, where Miss Abcahum had been standing, a huge pileup of bodies blocked the soots. bodies that had been thrown forward on empact. Passengers quickly shoved uside those who were dead or who were auconscious and simply appeared dead trying to reach some unfermuth who were calling for halp

740 now the clock read 3100 and the end funt pauge warning light remained on

TOM McCAHILL SAYS:

"You can pocket 5 to 7 an hour if you're good enough to fix these things."

The coming of the automobile built a multimillion dollar service industry in a few, short gas-esting years. The serve thing has happened in the electrical appliance field. Mempower is desperately seeded new to repair appliances.

But there is one big difference. Anybody with a few simple teels can get started in applicance repair. No expensive equipment is moded.

What is needed is the right kind of training. You can't strike it rich m today's job market with nothing more than muscle. Nor can you hang eate an elditine job skill while an electronic monster with buttons replaces men around you. It's like driving a buckboard down the Jarmy Turnpike. The fum would least you fast and send you out to pasture.

If you want an up-to-date job skill with good opportunity—why not take a look at the Electrical Appliance Repair field?

This field is loaded with opportunity because owery house in our high apased land is leaded with applicances. There are about four times as many applicances as we have seen, women, children and babies in this gould old U.S.A. There are over a billion of these electrical gadgate being used, abused and broken. If you knew how to do fast repair jobs on them, how much you can earn can well depend on how enucle you want to earn.

The opportunities in this field are all the butter because you can prepare for them fast. There's one short, seesot coarse you can take right in your own home- and it covers everything. I'm referring to a home-training coarse offered by the Appliance Division of National Radio Institute—one of the biggest and olders home study uchools of ize kind.

NRI gives you the whole works. Their training covers hasic electricity and how to use test instruments. They cover the electrical and mechanical operation of every type of appliance from toesters and coffernations of dishwarkers; from vaccum cleaners and automatic laundry equipment to air conditioners and refrigerators. They even then yet how to far farm and commercial appliances and small outs-lung engines.

The training is designed to be interesting, practical and first. You can make \$6 to \$7 on hour entre fixing

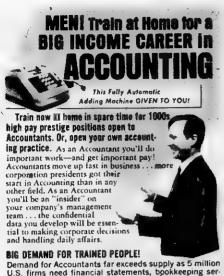

appliances in space time starting seon after you arrell. They give you all you need to know to do fast, scottable repair service. They even include sequentent without charging you actrs. And the full cust of the tresioning is surprisingly low.

If you are driving a buckboard in today's jeb market, at laast find out what the Appliance field can do for you. NRI sends you of sace, illustrated book about their training so you can judge for yourself. There's no obligation and they don't send a saleman to pressure you. All I my is get the facts and sae for yourself. Sand the coupen teslay while you are thinking about it.

Watch repairing pays exceptionally well. Part time watchmakers report earnings up to \$6 an hour. The field is not overcrowded and the market is constantly expanding.

If you've ever wanted a business ill your own, consider watch repairing. It's light, clean, fascinating, and a stepping stone to a profitable jewelry business

Chicago School of Watchmaking has been training pro-fessional watch repairmen since 1908, it offers you a concentrated, streamlined, home study course in this field. You learn to repair American and Swiss watches from your very first lesson. No previous experience needed.

Write today for free sample lesson and informa-tion booklet. No obligation. No salesman will call,

CHICAGO SCHOOL OF WATCHMAKING Dept 361, Fox River Grove, Illinois 60021

The jet began to rapidly sink into the sea. Only a few moments more and they would all be trapped.

Cordeiro got up from the position he had braced himself into against the life raft and tried to open the galley door, through which he hoped to shove the 25man life raft and through which the passengers could escape. But the door was jammed. He kicked it, furiously, several times, and finally it flew open. One passenger, Vivian Rosato, managed to get through it.

OW Hart and Spencer tried to push the raft through that door. But the opening was too small because galley bins that had fallen out of place on impact filled much of the area. Evan, the navigator, came out of the cockpit to help. They got the bins aside and began to shove the raft through, as water washed in and out of the slowly sinking plane.

There was a loud hiss, a sudden, chilling hiss. The raft was beginning to inflate, there in the cabin, filling the galley area. "Puncture it!" Hart shouted. "It'll trap us in here, puncture it." Evan and Emerson Ussery, a passenger who was thrown into the galley on impact, were trapped by the rapidly expanding raft, wedged against the galley wall. Hart pulled out a pocket knife. He stabbed at the raft, again and again. Spencer rushed over and picked up the first thing he could find—a plastic fork. He tried to rip the raft with it, but the fork broke. Hart's knife wouldn't go through it, either.

The raft sealed off part of the plane, turning it almost into a tomb. Only the wing doors were available for escape now, as the water began to rise to Evan's chest, up to his neck. Hart ran down the cabin to one of the wing doors and got it open, and helped passengers get through. Evan struggled, frantically, only partially conscious, and miraculously broke free of the raft's grip. Somehow, Ussery also got free, and both got out of the jet.

Up in the cockpit, meanwhile, Captain DeWitt discovered he was trapped by the bodies piled against the door on the passenger side. He shoved open a window and slipped out, then swam back to the left wing exit. With the waves battering against him, he struggled for a while and then finally opened the exit door. Passengers came pouring out, into the raging sea. They were on their own, because the crew had been cut off from them. One man shoved his wife and four other people through the right wing exit, then climbed out himself, until 27 people were hunched on the right wing.

On the left wing, DeWitt began to pull passengers through after getting the emergency exit open, and about 10 or 12 others climbed onto the wing.

About eight minutes had gone by, and the nose of the plane began to sink down, and soon only the tail was showing. There were 43 people in the sea, lucky to have escaped. Nineteen others were trapped in the cabin, most of them probably still alive-unconscious, stunned, or enmeshed in fear that they couldn't move. And there was no time to go back and look for them, to look for Margaret Abraham and two little girls who were

accompanying their parents on a vacation, and the elderly couples. The plane started to go down, slipped beneath the waves and settled toward the bottom, 5000 feet below, carrying with it those 19 people.

In the water, Evan swam over to Hart. "Where's your vest?" Hart asked him. "Never had time to get it on," Evan replied. "It all happened so fast." Hart told him he would try to find something for him to float on, and swam toward the right rear of the plane. And now they began to get lucky. Hart came across II large package, wrapped in plastic. He was about to shove it away when he realized what it was: the emergency slide.

ART ripped open the package and pulled on the bar to inflate the slide. But he didn't have any footing to brace against. A woman was swimming nearby. "Grab this thing and swim away," he said. "We can use it as a raft." The woman swam as far as she could go, holding firmly on one end, and Hart tugged quickly on the bar. He was rewarded with the hiss of carbon dioxide cartridges, and the slide began to rapidly inflate. Passengers began to gather around it now, hanging on to its side. DeWitt and Hart swam around the plane, pulling together stragglers and leading them to the improvised raft.

"Do they know where we are, back on land?" a passenger asked Hart. "Will they come to save us?" Other passengers quickly shot the same questions at him. "We'll be picked up any minute," Hart reassured them. Meanwhile, he was thinking: How can they find us in this weather? Maybe the sharks will get us.

This was "shark gulch" that they were swimming around in, an area that people who lived on the islands came to for sport shark hunting. Trying not to panic the passengers, Hart and the other crew members asked everyone to check on whether they were bleeding, intending to get any person with blood on him to climb onto the raft and cut down the chance of attracting sharks.

Two planes flew over now, as an early twilight began to fall over the area. The first was a Pan Am jet, which circled to get a fix and radio it back to the rescue center at San Juan. It flew off after a while, without dropping a raft. Some of the passengers cursed, but then a small coast guard plane appeared overhead and dropped two rafts. DeWitt and Hart started off for them, swimming in that forbidding sea toward the rafts because it was getting dark and they might have to spend the night out there.

As he swam, Hart thought: I've got to get them or be eaten by the sharks.

It was now 6:27, and just at the moment Hart and DeWitt got to the rafts, rescue helicopters began to appear overhead. A Coast Guard copter, first on the scene, lowered a winch and began to hoist passengers up. After just a few were lifted safely aboard, the winch broke and the helicopter had to cut short its operation. Three other copters, from the Coast Guard, the Navy and the Marines-from the aircraft carrier Guadalcanal-now arrived and the passengers and crew were hauled aboard and flown to San Juan. All

HOW TED VERNON AVERAGES \$20,000 WORKING 6 MONTHS A YEAR

When Ted Vernon* without to a mallbox that day, the things he wanted ascerned for beyond his reach Like big mounts, independence and security, a new future

Chances looked dus. Ted had no enlinge His only experience was hes bleed-end job. And he was part 40 Yet, when Ted mailed his envolupe, everyther he drossoud of became pussible All in did uses seril a coupon like the survival have below.

told, 43 people had gotten swiely out of the pinne, but only 40 survived. Two apparently died of heart attacks on the water and the third died of head inneres

Out of 63 people aboard the Carib Quaren, 23 were dead it was the list time in history, that a yet airliner had been foroid to ditch at sea and the experts in government and in the infinistry were account to learn every detail of what had happened to see whether the textbook on ditching and servival had weeked in

C.O Miller, director of the Bareau of Aviation Sofety of the National Transportation Safety bound, put it this way at hearings on the crash hold two mouths later in San-Juan

"As the first ditching in jut aviation history, it was the testing ground for lots of theories and ideas, and I think the hissons from this real test of the theories is moral to give as all a loo to think about

What the experts had to think about was the fact that the crash of the Carib Queen constrated confusion, chaos and tragic midakes all along the -ne

For one thing, the higgest question that was raised is whether a modium-range aircraft with only two organic should be used in long overwiner flights. When Oweness National put the DC-9 stress to see yet on the consult put of this type had been used on the consult put of this type had been used on the sort of over-ocean ora. The airline itself seems to have realized the danger involved, for a limiteria insent to prize insent to prize insent to prize that the consult put of the consultance of the consul

mentifiers ands mere being installed to give the plane greater (rings, and writt the tanks did get installed the jets should make refueling stops at Nassau. At the tons of the crash the tanks had not here installed and the refueling stops were not being made.

Another major quarties that has not have resided in swhetner small araports such as the one at St. Mancten should be permitted to bandle gatiners. The airstep has no facilities for instrument landings, which me hard to buileve in this section. If the condy that, but at the time the Carib Quoen made its last flight the tower was being minimal by one air controller and two kinds past one of school Actually that airport was, and still is, in family 20 years behind the energy.

The possibility that the first gauges on the BC-9 are inscourse is another aspect that is being explored. Other pilots have required spinning of the needle just like that on the Carb Queen, and inaccure indications have been spotted before. However, an a jet with a limited range be premisted to operate at the far and of that range if the fuel gauges may be out of whoch?

The giver somen thearings into the crash also showed the need for improvements in the design of ultimartal seats, seat beids, file jackets and life raids. It demonstrated that the emergency state could be designed jackets and sea is necessary. It showed there was a break force in communications limited to the cockpit—which had no limited to the cockpit—which had no incorroum—and the passengers and calini interveniment the necessary and calinications.

crew. And it demonstrated that Coint Guard rescue techniques were not all this have been created up to be. The radis that were dropped were so far away they could not be increasingly week, and the eigenful manual belongers broke flown.

A S of this writing, the three continu crew monthers have been fixed by the nictine for "poor judgment." Certainty, mistakes were made under the extreme pressures of the emergency. But to blame the nitot for existudating the amount of faul remaining when the tower at St. Maarten assured him the weather was fine for a handing is pure vengennoe "Pitet error" in the tax that anyecoment bureaucrats our to clone an investmention when they don't went the public to know that the bureaucrats themselves share much of the blome for what went wrong. If there was polot error, the error was brought about because the federal anency on charge of aviation permitted the airline industry to do just about what it pleased Fer example, using a small set on that run to The Caribboan

One federal investigator, upon at the amostocio fo the crew, said:

haze, twenty-three people died when the Corib Queen went droven flast you've got to reviewiese that 40 people ace alive because the crew tild a superb job of diching that plane, and getting thine passengers out. You've got to represente that the place would have meet goes down in the frest place if the government had door its job?"

DINGOES

(Centinged from nom 17)

front over on the other side of the horses, that made the short hairs on the back of his neck bristle. He came up as a halfcroach, his finger on the rifle tragger.

"Art?" he whispered and booted Westlin in the ribs. "Dingoes?"

Dingons were the savage wolf dogs of Quagasiand, Australia. The beasts were about the size of a full-grown wolf and hast grey hides. Inside their powerful jaws were razor-sharp fangs and some they had sinft their teeth into a victim, they couldn't be shaken foom.

Weakin moved as swiftly from simp to full consciousness as Tyber had anature, and was up on his knees, his rifte in his hunds. In the dien light the two men could see that a diszen dingoes, their ever gleaming in the darkness, had crept in on their belies close to the horses and wore ready to pource. One of the dingoes headed for the horses, growling deep in his throat. Type find his rife. The shot caught the buge causing in with-sie and sont it rilling.

The rife shot worked on some of the diagons like a stimulant, sending them scarrying back across the plains, but five of like wolf dogs stepaked straight across the ground toward Tyler and Westkin. Both men were firing rapidly now, swinging their riffus from side to side. Three of the dingoes went down. Tyler dropped the fourth one when it was only a foor away from him. The last remaining diago had gotten in under Westlin's riffu and now languaged for the man s throat

Westlin, yelling, backed away and swung the ribe turred of the animal's band. He managed to partially block the charge and protect his throat hat the snarling and protect his throat hat the snarling shoulder. Westlin stumbled and full backwards, franging the dingo down on top of him, as teach still embedded in his shoulder.

Joe! Oh, God, help me, Joe!" Westlie screamed.

While couldn't risk shooting the amen't while a scale result is thing. Wealin, too like dropped his rife, paided a knife from his belt and grabbed for the wolf dog's head. The dingo squirmed and writhed under Tyler's grip but wouldn't release its hold on Wealin. I note his hand, Tyler could feel the slims wertens of the dog's body, which was covered with a sand, with his other hand, drove the knife hinde in hetween the dingo's ribs, treasing moto the throat which all the sand, with his other hand, drove the knife hinde in hetween the dingo's ribs, treasing moto the throat with all his weight.

The dings of body period spasmodically. The dings of body period spasmodically. The dings of body period spasmodically. The same that the wolf dog now dead, although its feeth were still locked in Westlin's shoulder like the sprang paw of a steel frag. Westlin, moaning with piace, was rolling bask zand forth on the ground. These, on one kneep partned the knowle balled now the most of the dinds wheely believe now the most of the dinds.

dingo and twisted the binde up and down until he managed to pry the teeth loose from Westin's shoulder. He grabbed the carcass by the neck with both hands and flung it across the ground.

Westlin was rocking back and forth, holding his shoulder "Dama, dama, dama, Joz," he mounted softly "He got

me good.

Tyler attickly tore the raccod shirt away

from Westlin's shoulder and naw the imprint of the dingo's beeth where they had ripped the flesh away. "You aren't going to be able to do much

"You aren't going to be able to do much with your left arm for a while," Tyler said. "Blut I think I can patch you up enough until we get you to a hospital."

Tyler finished the wound with water from his canteen and then got one of Westlin's chiefs from the saddle bag, fore it into strips, and bound up the shoulder.

"Listen, Joe," Westlin said, "I'll be often now. We've got to get moving before the rest of the pack gangs up on the cattle hard out on the plains. I can ride with you all right."

"Not a hope of it," Tyler unid, shaking his head. "You'd only get yourself killed, and maybe me."

"But I'm all right." Westlin insisted.
"And this is the chance we've been waiting
for You know down well those few
dingons weren't proving by themselves.
The rest of the pack is out there
somewhere on the plains. They've smelted
those cows. They'll be closing in soon. We
can get ourselves a fortive in hiftes."

Tyler knew Westlin was right. The diagons always hanted in a pack of clone to a hundred whenever they went after a higherd.

UST as Westlin had said, this was the coportwisty they had both him waiting for fifthey didn't get the diagons now, they might not have another channe for months since the pack always holed up after a big kill. But he knew Westlin was in no shape to continue the hunt Sill, he thought, he could go after the dogs by himself. He wouldn't be able to get as many of them as the time of them together would but it was still worth act.

"You think you'll be all right here by yourself if I leave you for a white"! he naked Westlin

"Why?" Westlin asked. "What are you planning to do?"

"I'm going to try to get us a few of those diagons." Tyler said, picking up his saiddle and crossing to his beew

"You can't take on that pack by yourself," Westin said "Hell, they'll chew you to bits."

"PII be caseful," he said "PIR ride uside the pack, try to pick off as mans of them as I can on the fringe, then come back for you." He loaded his rifle, and checked the pistol he always wore in his lack. Then he mounted his home "Look Art." he said, heaving down from his madle, "you ought to the all the dependent and heaving around the his dependent of the property of the proper

Westlin knew it was useless to try to argue with Tyler. The two of them had been riding the plains for four years together and each knew the workings of

THEN 3 BIG

the other's mind almost as well as his own Westlin reloaded his own rifle, faid it across his kness and pulled a biantest up around his shoulders.

"Watch yourself, Jon." he said, wotching Tyler ride away into the somedarkness.

These two men, Joe Tyler and Art Westlin, were the closest to bounty lusters of the Old West of America as exist in today's world of the 1970's, and set neither of them had ever figured that's what they'd be doing until they met and snamed by in Australia in 1966.

Juseph Myles Tyler was born and raisand as on Carbon County, Wyoning, meer the Medicine. Bow range, and stone as before the Medicine alread as soon as he was able to all up-right ten a born. He went in Australia of 1966 after serving a birth with the U.S. Marines, and had planned on the trying to get himmed a small cuttle speeud of the West Omerstand, and from these went justiced to the cattle country just below the Capit.

His first stop there was at one of the local cattle apreads. In Australia, he increed, they're cabled cattle sations, and are quite aiming to western ranches in the U.S. Because he wanted to get to know something of the lend before he settled down on a place of his own, he hird on at the cattle stadiogua as "Yesgogar." the nemies

for conveys in Queensland

Alt Warrier was also a ringer as the

statius and the two men soon become friends. Westion was an Australian who had been been and raised in Sydney but had drifted out to Queensland because he liked open spaces and working with cattle It was soon after the two men began riding tomether that Tyler first learned of the existence of dingoes, the savage wolf does that constantly stalked the grazing herds and killed cattle at every opportunity Most of the ringers working at the station nicked up extra money by bunting the diagoes down in their spare time, since the animals were so victous in their attacks on the cows that n group of local ranch-owners offered a \$100 bounty for every skin of a dead dings brought to them

After a couple of months of hunting the diagons together in their space time. Tyler and Westlin discovered they were making more moves from the diago hides than from working as rangers. That's when they decided to become portners as fell-time

bounty hunters

Most of the time the two men fixed out on the plains because that's where the grazing herds—and dingose—were Sometimes the bords grazind over an area of a thousand square miles and the only way the two men could into about as surech of the dingose was on horsebase.

Tyler and Westlie usually knew when a large herd was being sent out for grazing and would follow the custle, living for months at a time in the ope counter. At rounder prime which the Australians called "muster," the cattle would be driven sent uncounter the cattle would be driven sent uncounter.

truck and shipped out across the plains. The two bounty lunters would thus move on and attach themselves to another grazing herd.

The men usud gatas, kaiwes, posconwon dynamiti-in-in husting down the dingoes. After each kill, they skinsued the animals and business their cases. When they had collected enough hides, they returned to one of the cattle yattions to claim their boosty. The work was often dangerous head were shed been classed and dangerous head were shed been classed and secasions during the four years they had home boursy home.

UNCE, a year earlier, Tyler had thought he was finished when a pack of the wolf dogs trapped him in a raving and killed his horse. Westlin had been away from the plains that day getting fresh supplies. Tyler had been resting to the ravine when the dingoes jumped him without warming. There had been six of the dogs that day and Tyler had to use has revolver, rathe and knife to fight off the attack. One of the dingues had grabbed him to the ankle and Tyler had a shout the dog with his rifle and then beat at the dead animal until he smashed the stuck of his rifle before he could get free. He had been bitten on the arm, the shoulder, the chest, and both legs and he was a the hospital for several weeks afterwards. Ilm to Toler and Wester such mindress were all a part of their job

Now as Jee Tyler rode out across the

tall transcul grass that detted the plains. he could feet a tightmost on his gots Lately, he had full that way more and more after an encounter with the disacons. He foured that one day soon he would not away his gene and get his own place stacted. The trouble was, heating diagens land became a habit with him. He liked the life There was freedom, donner, and the money was good. Still, he knew he didn't want to go on with the work forever.

As it would soon be daylight. Tyler rate more warily. He knew the herd was arazine about a mile to the south and as he toused a rise in the plains, we could see the cows, about 500 head of them, clustered together below. Some of the cattle week still tring down but with the comme of down most of them were up and feeding

There was no sum of the dingons has Tyler rade slowly, scarching the secrounding proved. The wind was blowing from the north which meant that if the wolf dog pack was anywhere around, is most he to the south of the hard or this rattle would have picked up the scent he now Tyler rade in closer to the hard, still watching for the dogs. It wasn't until he was about twenty yacds from the herd that he finally spotted the directes slighting through the tail grass well up above the grazing cattle Tyler judged, from a quick ucon of the crouching director, that there must be close to a hundred of them.

H E could find the smoot brook out on his body as he reised his horse in and ant for a moment in the saddle, calculating his plan. He decided that he would ride to the side of the hard, well out of the way, and wast until the dingons attacked Then, while the dags were occupied with running down the cows, he could ride outside of them and pick off as many as possible. He was just getting ready to publ his hurm over to the side when he heard many of the cows back in the hord soorting and lowing He wondered if any of the diagnos had shown thurselves

He raised up in the sturious for a bottom look and, just as he did, his horse rensul up, throwing him from the saidle. Tyler knew as he fell sideways that he was m trouble. He had managed to kick one foot free but the other, his right foot, was stuck in the stirrup. He held onto the rains as he felt, yanking hard on them to keep the beese from bolting. He landed hard on his back and felt the sudden gripding pass m the ankle of his right by just above where his fact was cament in the sterror sta pursued the ankle was broken

The learne tried to shy away but Tyler tunged herd on the retre and brought it up sudden Still gripping the rains, Tylin pulled himself far enough up to reach his imprisoned foot and free it. There was momentary blinding pain from the unklin and Tyler grabbed his rifle from the saddle holster and used it as a crutch under his right arm. The cows were bellowing loadly now and the horse was still jettery. Tylor knew the dingres would be breaking from the tall arass soon and, once they did, the hard would stampade straight over him and the horse. With his broken ankle, he'd mover he able to got out of the way in time He knew than, suddenly, what he had to

do and do last, Holding himself against

the side of his borns, he furnished on the audiflutes watil he found a stick of dynamite and a fuer After riding the range for so long, he had learned that dynamite was a good thing to have on hand in case he had to head off a stampeds-something he'd done on sayeral occasions. He often wondered why American comboys of the Old West helm't thought of it. Probably, in figured. because dynamite in those days was a litt harder to handle

Dynamite and face in houd, Tylor hit the horse on the rump and sort it racing for the far side of the plains. He attached the fune to the dynamite, knott, lit the fues, and toward the stick halfway hotween where he was and the hord was practom The fuce was sputtering when he heard the dingoes howling as the first of the pack closed to on the cows. The hord had past lmean to seems and turn to run from the dinages when the dynamics exploded. The whole herd wheeled swiftly away from the brast and, moving as one single unit, wont stampoding directly into and over the pools of an-charging diagons

Tyler pulled himself we as his riffs and workland as the wildly carrantog coun trampied over the dincers, their combined weight an unstoppable force that swept over the wolf does and eround them underfoot. It was a 'rightening and bloody name, with the disagres—backs and notice broken, skults split open, ribs caved sotevious to draw their dvines bushing out from sector the possessing horses

ONLY a headful of the dispose survived the englement, scattering acrossthe plains with tails botween their legs The hard ran off into the distance, the sound of their booves drammaine on the sorth recoding like thunder rolling across the plains. Behind those, as the dust settled, Tyler could see the deed and dying bodies of scores of diagnos littering the pround He was shoking violently as he hobbied away on his rifle stuck and whistled, with his fingers between his touth, uptil his horse came back

He pulled himself up into the soldle and rede north without looking back until to reached the apet where Westlin was warted, "What happened?" Westlin anked

"Can you rido?" he asked Westfix years, sure," Weetles said like'd already saiddted his leaves and after climbing up he solved again, "What happened, Jos?"

wouldn't talk and Westlin Tyle:

fallowed him curiouty until they reached the spot where the cows had stampeded "Brian, I've never soon such a night,"

Westin whispered "Everywhere you hook, thore's shoul ding out 'After we pack them in and get sur

dough," Tylor said, "it's quote for me. I'w had enough. The partnership is dissolved I'm out of the bounty-bunting business." He pulled his xorse around and rade away

Since that twee Tyler and Westin both have bought their own spreads, not for from such other, both have married, and have remained friends Dingous are still around to prey on cottle, but the only time Tyler and Westlin best them is when the well done throater their own lunds

SUPERMEN

(Continued from secto 32)

become a fanarai pyre for sexteen men High-test passion pet dumped down into the caterna's room and exploded before those poor devils had a chance to turn around and try to escape," said a

mamon to the right of Lt. Brown. Fire-fighting teams arrived on the assum, swelbed in asheron mats, armed with chemical entinguishers. They had a long light ahead of them. The flattus stars ragang way out of control

Then, incredibly, Lt. Brown now someone moving in the very midst of the fire Sailors impen to group and shout so they, los, new it man walking out gracethod

In his arms, the setter carried the charred remains of our of his buddies Without a word, he set the nearly cremated corpse down, then turned and walked back into the flames. The fireproof sailor reported this gristy manney fourteen termes, until he had removed the remains of each of his huddien.

During one of the immetractible seamon's tripe from the catagoalt room, LA Brown rushed filtward and tried to cestrain him from returning into the compartment instead the affine an

forest him to mak medical attention, but the young marnan simply walked back into the flames to retrieve another corpor With his impossible task at

completed, the seamon, 21-year-old Kou Cantrell, sucrendered himself to the corpu of concerned doctors who had gethered at the scene of the accident Incredibly, the examining physicians found ac evidence of any burns whatsoever on the body of Cantroll. They could not discover a single segged has 'One doctor remarked that there wasn't even the smell of made on his cimbina

ATER, 12. Brown sentified that he had soon Controll walk requestedly back and forth into the infered of the cataput

Today, the freeproof sailor is an evamentist to Mustavilla, Alabama Recently, he receifed his factactic service manurance for writer George Butler

Controll remembers being stunned and amand, but not afraid. Then he hasen to smell human firsh burning, and he know that he must try to help his friends. He picked up his friend's body and began to mart for the batch, which now glowed rudbut He shifted the corpus in his left arm, hault to pick up a red-hot wrench at his bare zight hand, and used it to appen she batch

"I walked out in front of the amount and bewildered officers, the chaptoin, and suiters and loid Jon's remains on the duck, Cantrell told thether "By this term the flesh and come off some of his boson " "I walked back into the compartment against the orders of some nearby affigure and prohed up another one of me buckfires."

Cantroll returned to the Same-or entapult room tone after time, settl he had brought out each of the fifteen charred corress. When the doctors examined the young araman and found absolutely no trace of any exposure to fire or smake, ho was told that he would have to assume imfore a Navy board of memory to explain why he had been able to surveye the flames what all the other crowmen had have Internal to death

The next day, Ken Cantroll mount inform the board of inquiry and caimly opened his Bible to Innish 43:2 "When thou passent through the waters, I will be with them; and through the zivers, they shall not overflow thee: when they walkest through the fire. thou shalt not he hurned millior shall the flume kindle upon thus."

ODAY, evengelist Cantroll in convinced that his faith clothed him with a supernatural power which protocted him from what would have been, under all physical logic, total bodily communition by the flames. Whatever source one might wish to credit for the superhuman strength which flowed through the young sensesn's frame and protected him from harm, Kim-Cantroll's story is a matter of record; and in in undecidity presented, segmented, and abysically and mentally hashby

nighteen years tater

The need to save the life of another uman being gave New York City fireman John Corato the guts to catch a 235-pound man in a mid-air luan 23 floors above Times Square in March, 1970

Milite Jacobs, a buyer for a flas-Autonio, Texas, department store secund out of a morning shower at the Hotel Edinon to be met by billowing clouds of smoke. He opered the door and found the hallway blocked with smake and fire Near pane, he had to crawl out through the window to totter 23 floors above the ground.

As soon as fireman Ceruta's fire company arrived, he spotted the man high above the street, perched precariously on the ledge near the air conditioner Cerate buil a feeling the man might pance and month, so he and Lt. Borry McKee went up to the root with a rune horness. Then, like some high-stakes trapeze act 230 feet above the crowded servets of Times Squeece, liceman Corato, a 155-pounder, dangled before the 235-pound Jacobs and called to the man to jump into his arms Jacobs leaged into space and the lightweight New Yorker clamped a lifesaving hoseling acound the heavyweight Texas

It was the same kind of amortish during to save another's life that gave a similar Grimsby, England, toonager, Burry Shirtcliffe, the strength to support a cattening brick wall long enough for two munit children to be removed from danger

Burry noticed Mark and Tiny Glenney playing in the shadow of a even-foot brick wall, then went about his own play Suddenly he attention was redirected to the walt, and he shouled his alarm as he new the wall hopin to topple over According to witnesses, the 14-year-old bus was there in an motion, pushing his hands against the tumbling mass of heavy bricks. Somehow he was able to hold the wall fong enough for the children to be led away by their older suster, Dubble-then the wall collapsed.

Dobbie Glenney, her mother, and some men who had been passing by attempted to remove the beavy bricks from the tecnager, but they were unable to bring the some kind of superhuman strength to the task Eventually police and the line brigade uncovered the heaty of the brave leunager, who had been granted colough supprhuman strength to save the seek of others at the sucretice of his own

Cincie Archibell, a frail, 80-year-old squanter, happened to glance out the window of her London apartment in November, 1970, to see the house next door billowing with flames. Knowing that three young children had been left alone in the bouse, Miss Archibell rushed out of her reom, ran down two flights of stairs, pounded up another, battered down a door with her shoulder, grabbed a beby under each arm, and led the older child to safety Billion Archibelt collapsed on the curb whom she surrendered the children to their resurning mother's arms, but she was soon released from the heapital.

JATE in 1969, Shoff Sigt. Cacl E. Million of St. Albans, West Virginia, found himself unable to appn either his main

chote or his reasons chote during a practice pump from an H-34 helicopter hovering at 3000 feet over Hoppstadien, West Germany Sigt Miller assumed the fetal position and survived the impossible plunge, suffering only broken anking, outs, and brusces

James Brown, an operations inspector on the Sankatchawan River Days up Canada, fell and was pulled foot-first total an 18-inch prigation pipe on April 16, 1970. Brown was sucked 600 feet through the steel tube. Miraculously still alive when he reached the pipe's outlet, he walked to a nearby farminouse. He was treated at a hospital for menor braises

Raymond A. Philbrick slipped over the summit of Mount Washington, Naw Hampshire, and survived an 1899-foot full without sectous treues in Saucott, Switzerland, nurse Elizabeth Mollenstein skinded off a recountain road and crashed 39 feet below Although Miss Hollenstein was not injured, she had to give first-aid to two of her would-be rescuors, one of whom serained his foot white the other broke his acm

Ma- scientific resourchers have buggen to conclude that we may all have within un such "mind over matter" potential to control pain and accomplish seperhoman facts. In fact, some have gone so far to theorize that with the right conditionium. anyone might be able to perform such yegi-like accomplishments as walking barefeoted over bods of red-hot coals and jumping from great heights without muscy. These same researchers must that the levels of consciousness operating during hypnosis and sloop may be measured by monitoring brain waves with electronic metrements.

As far-out as such experimentation may sound to the hard-to-convince, there amons to be a body of firm evidence materializing which indicates that the healy is able to gather fresh reserves of strength and endurance while the brain m in the "alpha state," that mysterious nomhetween consciousness unconsciousness, the area in which reality mikes with dreums Tests domomerated that such a mental stage brings about an increme in mancalar

mental nations sub- a parror cue

Whereas the mental putters in this including was motivated by an unconscious mind running rampant, the incidents about which we are concerned in this article have to do with unconscious mintle motivated by self-preservation or the preservation of another's life

Mrs Cedric Larsen of Mossevidao, Missesota spent 27 days in a hospital recovering from a back equity during the

summer of 1965. Now was pade and week from the many bedridden days, and her physicians had warned her not to exert served except for mild exercises

She was sitting in the front seal of the family car when she looked up to see the tractor her husband had just parked fall in him with crushing force. She jerhed men the front door and ran to the overturned muchine Her husband was till conscious, but was grimacing in pain He had one foot stuck in the steering wheel, and his body was pinned under the tractor's fender

Mrs. Lucson grasped the big wheel on the back of the tractor and lifted and pushed at the same time. Incredibly, the tractor recived and her bushand rolled his ledy out from under the fender. Then she let the tractor full back to the ground

But her work was not yet limithed. She worked her husband's foot loose from the stering wheel, then drugged him away from the overturned machine This last accomplished, she velled to Mrs Ruben Ronstad, who had been watching the stronge drama with unbelieving even, to call an ambulunce.

Ed Husby, a Montevideo lumberman. went to the Larsen farm a few days later He walked to the overturned vehicle and reind to lift it. He couldn't budge it Eventually Husby used a powerful winch to pull the tracter to an upright position

It was a good thing Cedric didn't have to rely on me to lift the tractor," Husby said lover "I couldn't have moved it an inch

Codric Larson suffered a fractured pair is because of the farm socialent. If his wife had not been empowered by that sugarhuman burst of strength, his injuries would have been greatly multiplied

When Mrs Larsen was asked how a woman who had just returned from a month's stay in the hospital could lift a massive farm tractor, she said "I guese a purson gets mighty powerful in cases like Lineur

N August, 1969, Professor fuling E Schulz was pinned under as overterned tractor on his 80-acre farm near Marville. Missouri, " a " ur days before by found the will I free himself from his painful metal prison. Then, in spite of broken ribs, badly bruised legs, and four days without foul is water, is walked to the car that he had parked half-a-mile away and proceeded to drive four additional mater to find belo

Charles Joneson, a Future Farmers of America instructor in southwest firms, bainted a tractor off a student long enough

for other boys in the class to free their pinned clussmass

Vicki Obsey of Dudgorou, Gippoland Australia, found the seed to become "mighty powerful" when her 15month-old son, Adam, fell men an old abundoned well over 15 feet doop Instinctively, Mrs. Offney jumped into the well, then found berself waist-deep m scummy water, her bare fect chopped up like hamburger from hundreds of broken bottles that had been thrown into the well For over eight hours, Mrx. Ofney stood in that dark well, holding her son above the water antil male came

On May 22, 1970, Mrs. Emnis Claudi, a 30-year-old wislow gained her mighty power from some unidentified more source when a 500-pound excus lion escaped from its cape and begin advancing toward a group of children

Sultan, a seven-year-old loon, had become annoyed by the children screaming near its cage; and when one of the children unknowingly removed the bolt that locked the sliding gate of the case. the massive beute began to move out to enjoy both his revenge and his dinner

Mrs. Claudi looked up from the clothes she was washing outside of her mobile home at Intra, Italy and saw the lion fifting the gate with its snow. She ran toward the cape, shouting at the kids to run. When she confronted the fion face toface, she butled up her fist and struck Sintens twice on the raw. The ison lay down on its stomach stanned, and Mrx Caledo pushed it back into the cage as if she were

showing a heavy power of furniture around a room. Once she had the lion back inside the cage, she slammed down the gate and said the bolt back in place. Her only moury was a bruised trauckle.

Elmer Kirkeberg found his motivational key to superhuman strength when his wife was expecting their first child and snow still blocked the roads of remote Wolf Lake Township in Becker County, Minnesota Kirkeburg knew that his wife's time had come to deliver the baby, but that reaching a discher in time was out of the question. He had only one recourse several miles down the country road was an old woman who was a skilled midwife

Concern for his wife made Kirkehern abandon caution and drive too fast on the trencherous roads. His Ford stid off the dist road and into the ditch.

Although he weighed only 135 pounds, Kirkeberg knew that the only help available to him at that moment had to rest somewhere within his own hody. He braced his back seamet the radiator. fastened his bands under the burntur, and lifted the whole front and un and out of the

ditch and set it down on the road. "My only explanation is that there was only one thought in my mind at that time and with such a concentration of effort a strength came to me that allowed me to accomplish what needed to be accomplished," Kirkenerg stated later

In the winter of 1969, a Canadian man from worthern Onturio walked five miles to a hospital while carrying his own severed arm Porkage the only thing that saved him in that mumbing cold was that he was drugk

ONEN on his tuck and out of work as a neasonal farmhand. He had tried to hop a freight train. In his drunken stupor, he missed the freight car, fell under the train, felt the heavy metal wheels thew off his acm. He solvered up fast, wrapped a cloth account his bloomy stump, found his severed arm several yards flows the track, then set out on the five-mile walk to the newrest bosnitul

In a four-hour oppration, he and his arm were rejoined. Although the arm is now quite a bit shorter than the other, the formhand will still be able to work for a living. "I mucce that was what mave my the guts to walk all the way into lows," he said "I didn't want to be a one-armed cripple all my life."

The famous French psychologist Emile Come believed that pure could be consucred # the unconscious mind could work on the formula that "the pain is passing away rather than there is nhis in the a great injury or sold capit pain and a would simply not accept the formula that there was no pain

Other psychologists have unimed that the secret of mind over matter may be in the ability to induce a state of mind completely open in suggestion. In order to Attach spirit a state of mond the conscious mind must be latted into a feeling of peace and security so that the powers of the arconstruct model might take over the control of the physical body and make a superhuman giant of strength out of aven the most frail physique. . . .

(Continued Dom once 56)

Walter namely "Fd like to have you on location at a fee, to service the bikes do preventive maintenance so I won't be held up in my shooting schedule."

I was about to cut him off when the words "two thousand dollars" populations of his mouth and into my ears. "Two work." was the exact statement

Wheel the bikes into the shop," I said to my guys. Then to Walter "Come into my office where we can talk

We talked, and all I could think about was bow far \$1,000 would go toward, say, building an extension to the shop of Moore's Cycle City And anyway, I needed a vacation and this was as close as I was likely to get to it for a while,

So we made the deal two thousand, plus 'fringe benefits,' which included my regular profit margin on any parts Walter's cycles would need, and the regular rate of pay for any of my mechanics who I might need to belo me Walter also said I could stay with the film people at the posts morel than were using beautiful assumming pool, bur, Brest rescaurant

) spent the rest of the afternoon getting together the space parts I'd need and loading them onto the van. Then I put my three hest men on Walter's bikes and told them to finish them even if they had to work all night-at triple turns maid for hy Walter then ride them out to the location next morning

So about two hours after Walter had ridden in he was on his way back to location with his new mechanic-inresidence

Title film company had made their came in a stand of seven at the fact of a small-sized enlagtain. Bits stell the trees was a paraster wile stretch of script hands good for cycling, and then Rouse 17

There were tents where the actors and actresses not dressed and made-up, a station wagon equipped as a busch counter and bar-with a great stock of figuor and big spotlights, camerus, microphone beoms and all kinds of equipment I couldn't begin to describe The whole place had the look of an army his man area , enhanted with a carnital The movie people were taking a break, sifting around on convas choirs, sarawling in the shade under the trees (the temperature was about 100 *) or sitting on the chappers drawing and talking

And the girls blooder, brunettes, rotheads; alt of their tall and long-legged, with the Suggest Strangers breakly Dog ever men. And with no bras - sight. And wearing either skin-tight T-shirts ur unbuttomed denim bikers' jackets. Thus bet it alt thome one and it was preset

The actors didn't look any more like nemine outlaw bikers than Mickey Mouse dury. They were but and pouncular but somehow they were too circum-cut and their muscles got that way in a gym not through hard work or brawling or hauling

a ovcle around since they were kids
"I'd like you to meet our techical
adviser, who's a former outlaw ecclist,"
said Walter "Er , you can meet the
girls later," He had watched the eyeing
them as we walked from the truck.

I had already placed out the one my who looked different frout her rest and, sure enough, he was the "technical adviser"—Hack Jones (Ormer outlaw bliker, like myse!, recruited by Walter to show the novice cyclists how to at least avoid killing themselves while making the move, solve on outlaws" customs and behavior, act a bit part in the move and do my dispersions right for the star.

do any dangerous rating for the state. "Man, am it glad to see you!" said Hack, taking my big hand as his bigger hand "live tried my best to keep the choppers running, but I'm no mechanic and you can't replace a flutch when you don't know how to di it—and haven't got a new clutch anyway. Kight?"

"Right" I said liking Hack right off. He was a big, husles bear-like gus with a short crew cut and pushed-in nos-

Hack took me over to the "chuck wagon," as he called it and introduced me to a few of the starlets, handed me the strongest bourbon and soda I've ever had, and I began to feel right at home

Titl rest of the day was taken up with me as ong the siles a last the angle of the weemed to be in fair shape so will lead as wear the girl. The desired adjust the bester and clutches on those that needed most Next day of a gent with the work.

White work of the siles and clutches of those white work of the siles and the couple of my guys to help me with the work.

filming a fight scene, with Hadde doubling for the a "fighting with another member over a code chis "and She was Vakerie Vatentine (real name Marx Monahan), who I'd seen in a couple of 8-moves. And she was lamiastic with the biggest breasts, the longe legal, the wides hips, the pretisest face and, topping a lall. No pottlaw nama ever loyed file her I was turned on, good, that I didn't think I had a chance I was wrong.

After the scene was finished, we knocked off for the day and tiled into the station wagons and on the choppers to head for the motel. I grabbed the best-looking chopper one I'd been wanting to ride all day, and was revving up to pull

"Hey, can I ride with you?" said a feminine voice behind me I turned "Valerie Valentine or VV, ax I was soon to call her "The only goy around here I'd I trust to ride with a Hack, but he y got himself a steady pirl You look like a real evolust."

Vs was wild from a distance, and a destroyer close-up. All breasts and long han and big blue eyes. She was wearing black leather yeans and a biker's jacket, seeves cut off and only the bottom snap closed. I gulped one, fried on take my eves off all that hare bosom and said "Climb."

Some Super great to complete the super great to complete the Statement Ed. (1) Before the Ed. (1) Ed. Masculiner Co Copt 325

VV smiled, saw I was freaking out and snapped the jacket more-or-less shut

She slipped her belmet on, kicked down the foot peas and climbed on settling down and putting her smooth, creamy-tan arms around ms waist. Her breasts flowed against my back and moved as if they had a life all their own

Quick-like. I kicked the cycle into rear. let out the clutch and started across the flat plain to Route 17, following the lead station wagon. I could hardly wait to get to the motel and the pleasant evening I was thinking about I figured I had it made already. I was right, but things were

postponed for a time

We were wheeling along I really screwed it on, pulling far out in front of the caravan, the bike responded so beautifully. And the feeling of VV hanging onto me with those big, pillowy breasts pressing against me was a part of any evelist's dream ride But just as I was really digging it all, I saw them, a dozen bikers parked smack in the middle of the highway. And as I got closer, I saw they were outlaws. And they stunk of trouble I was ready: I know how outlaws think,

having led a pack, so

I stopped my bike, taking my time about it, ending up almost wheel-to-wheel with the lead outlaw bike. The bikers were just lounging there, smoking big cigars and sipping beer.

"Man, you guys must really love this of road, buh "I said, smiling. "You're living on it

BUT the way I said it and the way I smiled told them that I'd take no crap from them. That's the only way to deal with outlaw bikers, show them you're not scared (even if you are), but don't throw out a direct challenge, either. They hate people who are chicken, a man who won't stand up to them, a fittle anyway

Try to figure out what they're going to do They're moody, volatile guys, likely to change their minds about busting you up when they see you're neither scared nor hostile and past ride off or, if you're in a bur, say, they might slap you on the back, call you "grooss" and buy drinks for you the rest of the night

We come to see the movie people, said the chief, a guy called Butcher, who I'd heard about in Phoenix. His gang was the Tartars M.C., with 12 or 15 members, all of them seammy And Butcher, according to reports, was chief because he was soummiest of all

I took a good look at Butcher. He was about six-two, weighed maybe 210 - a 30pound edge on me, and was dressed in "colors" that were stift with oil, dirt, sand and heer, cowhox boots and, the only clean part of him, topped it off with vellow-blond hair, long and braided, the braid reaching down to his wast. His face was long and sharp, and he had pure white teeth that protruded as he smiled at me-

"The movie people are there, behind me." I said, "I guess they won't mind stooping to say hello to some fans.

"You one of the movie people?" Butcher asked "You don't look like them movie people. We seen them come in. those lowsy fags on those groovy choppers We dig the choppers and those chicks The chicks we like You ain't one of the minie people, are you?

No. I said, not saving anything more about who I was. I'd let them worry about me. I rode a cycle outlaw-style leaning was back head low, and with a certain arrogance that only outlaws have I hadn't lost the outlaw look, and they thought maybe I was with some outlaw gang and they apparently didn't want to provoke a fight with me personally, which might star up a war with my gang

The rest of the choppers pulled up, then the station wagons and vans Walter hopped out of a wagon, with Hack close behind him Walter didn't looked scared, just teed-off

What's going on here?" he asked "Who are these . , creatures? Do they own this stretch of the highway?" He had sense enough to keep his voice down,

They want to see you movie people," I said. They're great movie fans.

Waher got me all wrong and said, griening "Oh, How more We'd he glad to give you fellows our autographs. The Tartars broke up at that, laughing

and howling like a pack of hvenas Butcher laughed louder than the rest of them and shouted. "Hes Ya hear that feflows? The dwarf is gonna give us his autograph.

Walter turned purple with rage and, walking up to within six inches of Butcher, called the Fartars' chief, among other things, a filths, smells reptile, a longhaired clinet queen, a Mongoloid idiot and a buck-toothed son-of-a-bitch." That was damned fine cussing-out for a dwarf flutcher was impressed and his raw dropped in dishelief. But he couldn't take such insults without revenge

"Here it comes," said Hack, setting himself. I told VV to split and got off my beke, hoping the other guys wouldn't be afraid to get their Hollywood haircuts and nose-jobs a little messed up that then we heard sirens, far off but coming on fast The state cops, and this was one of the few times I'd be glad to see them.

WO patrol cars, throwing up dust, about a mile down the highway. The Tartary hauled out of there, blasting past us spening exhaust furnes. As the last chopper toured past, Walter scuttled out from behind my bake and stood in the road, shaking his list after them We assured the police that there had

been no trouble, that we'd been chatting friendly like with the Tartary Walter didn't want any time consuming bassles because of his shooting schedule. The copy escorted as to the motel I was sure we hadn't seen the last of the

Partiary But I won had more pleasant there's to think about

That night we had a party around the motel swimming pool, and I've never seen timer hikinis answhere. It was as if all the garls were competing to see who could expose the most flesh set still stay within conventional limits. But he the time midnight same around, bikint tops were off all the girls Swimming and drinking were forgotten except by a few hard-cine drinkers and hard-core athletes, and soon we were all nude, the poul was about empty and the tisomy were occupied.

VV and 1 as nude as anyone, ran to my room and wrestled each other onto the bed. I'd spent two hours or so watching and fondling her beautiful body and was all but exploding. And so was she.

I began to stroke her breasts, hard, and the pink nipples stood up firm and rubbers. Her entire body was hot, feverish, and she moaned in my ear, "Now. Don't wait" Then she thrust her belly against mine, rotated her hips and nulled me close, biting my neck and shoulders and clawing at my back. In minutes we both climased, then lay back, exhausted. After a time, I was able to move and, rolling over, pulled VV close to me. Her eyes were closed and her body was limp and cool

'Cigarette," she whispered. I groped for the nack on the night table, lit two and we smoked quietly until we came down to Farth

"Great," I said

"Outasight," VV said, Neither of us finished the eigarettes. We made love again, slowly, savoring each other, and I left little of VV's body unkissed or unfondled.

OR the next few days I didn't have anything to do except change a few flat tires, adjust brakes and clutches, and give the worst-riding actors a few lessons to improve their technique.

At night VV and I went swimming, made love and got to know each other. I was, all things considered, having a great vacation. But all the time, the Tartars were in the back of my mind. Bikers never forget an insult. I was sort of waiting for them to do whatever they were going to do. And I knew they'd do something. They did

One afternoon while we were taking a break I tooked across the desert toward Route 17 and there at the side of the road, perched on their cycles and looking like a flock of vultures, were the Tartars.

"Look." I said to Hack as we sat under a tree sipping cold heer. "Company.

"Yeah I knew they'd show up sooner or later. How long they been there?" "I don't know. It's like they dropped out of the sky. Guess they came in while

couldn't hear them. Soon everyone was uptight over the Tartars, even though they were just sitting there. Actors blew their lines, a couple of the guys had minor spills from looking

over their shoulders at the Tarturs. "What should we do?" Walter asked e. "Everyone's freaking out. Those bums' They're lousing up my shooting schedule!

They're trying to bug us," I said. "Tell everyone to cool it. The Fartars won't try anything. They'll get hored after a while and split.

I knew damned well that Butcher and his Tartury had more in mind than just bugging us; outlaws never stop at bugging people, it isn't their style. But after we went on working, or appearing to work, the Tartars split, in a deliberate show of resving their engines and doing wheelies down the highway.

We didn't have to wait long to find out what the Tartars would do for revenge.

and it wasn't anything unusual for an

outlow gaugest was typical.
The Tactars weren't about to take on the entire files ceen-actives technicisms truck drivers, everyone Their strategy was to nick us off a few at a twee, or as many as they could get before they were scopped. I knew this and I had warned everyone But people can't be thinking about something like that 7d hours a don

They're sure to get careless Plack and his girl. Myra, a brautiful brunette starlet, and VV and I had become close friends. We'd gone into Phoenic few times together, for fue and for me to me how Moore's Cycle City was doing ! worried, even bough I'd left things in charge of Charle Berry, my acc me-banic But the night the Tagrage arracked, VV and I didn't go with Hack and Myra They ment with another counte and ended up in a roudhouse that they should have known enough to stay out of But they didn't and at one A.M. the phone in VV's room rang She picked it up and said, What harmond? Yes we'll be right there "

I was wide awake to then and asked, "What did they do and who did they do st to?" I knew the Tartars were involved

They got Hack and Myra, and Stan and Ella: raped the girls and stomped the news They're in the hospital in Phonnia."

The vendotta had because

We woke up Water and the chick he will be the was sleening with and told him. His two concern was for the people who had been buct and he would have run out of the room to his can half-naited if we hadn't reminded birn that he hadn't put on a shirt or shows. All the way to the hospital he was forn between notifying the police and getting a lot of bad publicity and, as I suggested, cooling it and letting me take care of the Tartars biker-style

At the hospital we learned that Huck and Stan were hart pretty badly, that they'd been stomped and chain-whipped, and the pirk drapped into the woods, stripped, forced to engage in acts of perversion with Batcher then raped by most of the Tartars Both girls were under heavy sedation; the been hysterical when a passing motorist had found them wandering node on the highway. Mack and Stan had been left unconscious in a parking for behind the roadhouse

The doctor said we could see Hack for a few minutes, and then a state cop came pelo the waiting room and asked us if we knew anything more about what had huppened than he did, like who had "perpetrated the crimes." Water and I looked at each other and said no, that there had been a bacroom brawl and the girls had been attacked We'd let the authorities know if the vectors said anything more

The con nodified jotted something down in a notebook and left. Then VV and I went upstairs to see Hack, and Walter went to see Ston and the girls

"It was quite a mench-out . . . hut it didn't last lung. ' Hack said, unable to finish the grin he started because of the bandages and adhesive tape that covered half his face. Both eyes were swollen shut, his acut was in a case and his ribs were

VV had started to on when she can him, and I was soone red and having wild fantacies whost what Pd do to Butcher and the Tartacs. Hack must have read my mind, because he said. "Don't do saything duoth, Thorn They're rough bustards Then he drifted off to sluop, feel of

drives to kill the main. You're going after thom, aren't you?" wid VV

Leave so had on

What can you do by yourself Oh, I'll not some belon it black thinks the Tarturs are rough basturds. I wonder

what he'd think of my old club." We left the bossital after I'd spoken to Sean and the girls. Stan wasn't as budyhurt as Hack; the airls were cut and braised and, of course, felt dirty and Decrements described I total them I had some action in store for the Tartars and said a would be a helluya lot worse than anything the law might do to them.

HAD a may feel I began making places are and unding whereas one old cycle gang, the Agaches, who were ----many propriation in the second or the first --me hav again Phone we in Smear wort, fall and thin as a spear to not the nickname "Burning Spear" as Indian sirl friend). And Hermit Grant. bearded on with his ragged, sweat stained cowboy hat and his cheekful of chowing tobacco Betterhall Flohart, all 300 pounds of him, his Hurley was equipped - special suspension Naturally, Zamo Zelinski showed up, ready for a fight, as always, his was shaved - to occasion ("Makes to look fierce," he said, "just like old times.") And last but not least, Roach Diving, small, round-shouldered and midlooking, but the fastest man with a chain-

while ! diever seen We who oped and hugged each other, then I took them around behind the shop. broke out a few six-pucks of beer and told them all about what had hampened and that I needed their beta-

"Hell, skip the pep talk," said Spear 'Just tell us what you've got in mind for these tough-ass Tartars."

"Year I've heard shout those weindos," said Rouch Bookies every one of them And that Butcher is a sex nut Likes real far-out stuff."

Sure, they busted up a town i Montana not far from where I live, said Zappo "Sheriff and a couple of deputies couldn't do a thing. I'd kinds like to have a shot at them floor actin' bored with family life. News some obt-time action. моние пестеналон

"They got lots to eat out at that movie " usked Dutterbud "W f'm goons fight, I ginta ear

So it was settled, as I knew it would he once an outlaw, always an outlaw, when it comes to believe our your cycle. bookbass. I took the Assection M.C. out to meet

Walter and VV and everyone working on the movie. Waltur, in spote of how builts he felt about the people who'd been hurt, had to wrap up a couple of more scenes by the end of the week to stay on schedule, so he was banns to have the Apaches around for protection in case the Tartars showed no to bug us. And the Apaches loved the ides of being on location, especially with

the girls there

We finished the sorms on Friday and Walter gave everyone the weekend off But the Apaches were going Tartorhunting and, miracle of miracles, see had four volunteers from among the actors They had liked Hack a lot and wanted to do something for him and the others. They weren't the most rugged-looking specimens, even in their "colors," but a body is a body when you're outnumbered

We made the new recruits "Honorary Anaches" and welcomed them into the nack. They were as proud as kids who we won their first Boy Scout merit badge

Walter rented a few more rooms at the motel for the Apaches, not knowing they'd he sounding most of their nights in the starlets' rooms. They d never get so much sex with so many heautiful chicks as long us they lived, so they made the most of it

N Samulay morning I called a "powwow" to plan how we'd suck the Tartars seto a mench-out- a mench-out me conlide's afford to lose

I've got an idea that it's not exactly pleasant " said Zappo "Sence we don't know where the Tartary have their headquarters, we can't go and bust them. I think the best way to flush them out is with girls. Use a couple of the starlets as

We agreed that this wasn't a pleasant these to do and was also dangerous - but it was the only way to get Butcher and his game into the ones.

The scheme we worked out was for three of the Anaches and three starlets to begin going to the bars and roadhouses that were known biker hangouts. The girls would get reputations as about a white mere turned on by outless bikers. Sooner or later prohably somer, the matten grape-ine being what it is when new mamas' are in time wied of the girls would get around. They wouldn't say they were stariets, of course. We were sore the Tarrars would show up. And the rest of the Anaches would be waiting nearby.

Two weeks That's how long it took Two weeks of working all day in the heat and sen and then meeting until late at night outside some biker hangout where the girls and the Apaches would be putting on their act. The only good thing about this was that the Apaches rotated in going out with the girls and ended the night is built with them

On the Sacurday night of the second week, when everyone was getting discouraged, the Turtury finally showed

Spear, Zappo and L and the three girls, were in a sleazy joint called the Vulture's Nest, about five miles outside of Phoenix There were no other bikers there when we stomped in looking belligerent. The girls wore dressed in tight blue seams; two of them were shin-baseane T-shirts, while the third, Gail, were nothing on top except a fringed sunde vest. Her 38-C breasts

decouries's meany inclusives and throusened of sind teres. From an worse time from a hought of the first time of time of the first time of time of the first time of time of the first time of t

LA BALLE EXTENSIONS DISPURSION S STATE OF STATE

were exposed with atmost any kind of motion she made—walking, drinking a glass of hear, setting down, getting up Greatest trouble-bait I'd ever soon. And she did the trick

The dozen or so pumple as the bor disha's pay too much attention to us, exampt for the pays evering the girls now and then when they thought we weren't looking.

We were just about to beind back to whose see I left be ofter Apolese warring and ride to the incohe when, about mideight, we heard the rose of cycles approaching the Vulture's blook strapping and revising. The valtures had arrived, if the wome who we forested from it be

they were who set figured them to be headed by the Tartars, all of shown, headed by the tartars, all of shown, headed by the tartars, bit long braid swenging behind him, his study even earching the rarous errogently autificating what he'd bours looking for—the three girls he'd headed about And his eyes (load on Gail, with that fringed your accordy hidings her substantial benorm

E looked at her, then at the other girls and then at Spoor, Zappo and me. He didn't recognize me because Ud tot my heard grow out so I'd look more like a

penuine outlaw

For a while the Tarriars potential to genore us, noting as if the girls were the lost thing is the world they worked. They knamed on the bec, several to their perawled on choir's with their feet on the tables. They talked loudly houghing at staped jukes. The other men in the barzenoud the mounting tension and drifted must after guidely feetibling their drifts.

Soun it was just the Tartars, the sat of us, and two worried borrentnes. The Tartars got desoker and loader and regater, And more theatering

Then it breshie.

There is broke.
"What are three good-looking hunds doing with a bursch of many bitters like ther?" soked Butcher, of no one in particular, but looking at the piris

"They got class, Goldfietck;" said Gail Lots of Spank. But just then I didn't case for spank, like calling a merderous billor. "Goldfiecks," Butcher didn't like women who were spanky either. And he ubviseely hered heing called "Goldfiecks." "Swart-mouth broad," he snarhd

Smart-mouth broad," he snarfad
"You wich you had my hair instead of that
bicached mop of yowrs."

blenched mop of yours."

"Ney hair's natural blonds!" Guil yelled
"And you're a dirty smally croup!

Weledest argument unv biker had ever been in I genna, but Butcher had what he mounted to bless us so p Be let out it wordeless, animat-like bellow of raper and he and the nearest Tarters came after so And where the bull were the Apaches, I wondered; an L withouted the stateless seed cycle chain from a round my want.

As one of the hacienders stoved toward the selephone, a Tarter headed him off and shoved him and the other bertender into the men's room, wedging a chair water he deorit not

The Tartners adjust toward us, thus charged like lunnities, and before I chief whip more than two heads, we were flown, and all I could do was try to project my gark new group out hand from the big cycle hooks and chains and papes that were sacring to hometer down, hortning, and

stepping my hody. Them, admissful the courlings and greats and corress, and the thomps and thouls, I haven't he rear of cycles gearing down, and beakes acrosching. The weight of pion heise so could set high agains as the Tarcata pollula may from us to most the most challenge the Apaches, who now charged into the colliness. West usual I may waster attribute for law monitor waster or the colliness.

I wasn't in bod shape, considering the odds, and seither were Spear and Zappo. Old biker training in low to take a stemping with the mineration of mjury to vital organs had saver us

We were both whit to join in the action, so right off, shill down on my kines, it whiting the control my chain against a Tarlard shill, the control my chain against a Tarlard shill, the household my chain against a Tarlard shill, the household my chain the self-in the salin, getting low enough for me to sweach him in the self-in with the chain? I had weappind around m. first Their was up and striking around my first and chain their name, is an any Tarlard within range, is any part of his anatum's that looked appraisached, with my first and chains and house

AAPPO and Spoor worsn't restong; they had one of the biggest. Tacture back of sets a corner and were, apparently, trying to sensible him right through the wall as they punched and kicked until he sagged, went gloove-eved and transhed to the floor.

I whipped my was through the higstraging heighes to where Blacker was, near the box, swenging a lead page as Blacker-bid, loss speece of his enormous both, was as agile as a cat and kept stipping the page or taking glacing blows on his blobber-protected forestras. The he slugged Blacker in the gast with a his, meaty list. Butcher hear double and thus Blacker-bid he his his Blackers on the floor and was sitting on him, his 300-postnik squaemen kin immobile.

Room has There?" I yetted above the zame how has There?" I yetted above the fight. From the held count, I could use that the Apaches were wisning, but not by much Flee dold were evening, but not by much Flee dold were evening how but like Held Apaches were with the proceedings of the held of the held Apaches were the how held and to help me the held of the held apaches were the how were the held of the first held of the he

During the fight the chair had hum historia way from the man's reom door and I watched as a barriender stipped out, see also dever to the phone and made it call to the policy. Then I regioned the births, stepping over a few Tactar houses to want in and clobber a couple more of the burns.

Finally, all that was left of the Tartans was exhaust smoke from the bites of four five who split, another pair crawling to the itoor and tho rest in vierous conditions of unconsciousness on the floor, audio tables of sincurand analysis walls.

Still being sat on by Butterbalt was flutcher Butterbalt was talking to him quiet-like. like a big brother, saying "That wasn't a very note thing to do, man, rupong those lister officts and hunting up out friends. Now, we can't but you gut away with that can we ""

All Butcher could do was squirm and mass for breath

Our guys didn't not off unturn but there was nothing too serous—a fen heeth mount (old stuff to inscres), cracked ribs and specimed wrists and the association to besiege, cuts, homps, and black eyes. Even our Honordry Apaches came through without any permanent duringer, but they'd need pienty of make while the property of the course in broad to the course.

up before they got in front of the camerasthat we had one more thing to do before split and he the cops take over flatcher.

"Let him up. Batterbuil," I said, as we all gathered around.
"What you nonne do?"

Butcher asked, struggling for breath 'We're going to let you be the guest of honor is an old Apache custom.' I said The Apaches granted, nodded and began to line up for the old custom. The gauntlet "You are serienced to rise the gainstet.

thicker made a break for the door but we grabbot bise and forced him to the head of the double line we formed that hid

we're giving vos a sporting chance to get through the door. That's more of a chance than you basteds gave our friends," I said as I took my place at the end of the line. "If you can get through the gaantles on your leest you're homefree.

We want only flats—protected by our heavy teather cycle goantless—with only as occasional host in the ribs or grown by the less-restrained Apaches.

Butcher started down the love but didn't get far as he was spent in a complete circle by a rupping right to the head by Hernit Belive he could reorent himself. Rooch caught him with a hoot in the guts, then an uppercuit that atraightened him up perfectly fer another fist in the linux, counters of an Homorary Apache.

"weat!" said Butterball, and gave Barcher the old-fashioned one-two flutcher was now heading away from the door, blubbering and mounting, spitting

biood and tooth He went sprawling. The girls and the bactenders were standing on top of the bar, cheering as on

We got falciber up and statted him in his way again, maximing up to the, excluding the condition that Hack and Starn and the golds were an when we saw them at the hoopital. We shagned blotcher with quick, thooping, panishing blows until his face was scarcity recognizable. It would be a long time before he rigid any more wanten, see heat up anyone, or route his chopping, of did anything visiting.

He diverged about a yard from the door, with constours has unable to move. "No more is not more in the door in the door that call value," Wat a minute? There is something? I want to do for Myra (she was something? I want to do for Myra (she was not the converse A will can get hook at this creep for eaving I've got a bleach jub Anyone got a lainfe?"

I handed Gail u knife and the said

"Read HI"

"Hold him real still Goldilooks is patting a baircat...

"No. No. Please!" Butcher shrinked, strengling with all that was left of his strenglin, seasoning and writings as it has were going crazy. But it didn't hep. Gail maily saved off his long godden braid Then she sawed away at the rest of his hair until he looked as if he di gotten his basic stuck in a chicken-piocking machine. And all the white we whend and cree!

Galf held the long golden braid over her head, Isaghing. We joined in a cheer, then dropped Butcher to the flose where he putted his jacket over his head and moneral.

We left here that may, and as we resemble down the highway, we head the screen of the state police watting in the distance as they headed toward the Valtures. Nest they headed toward the Valtures. Nest the reale of punched-out, tired, but heading we'd done the Hack, Sum, May a me Elbi wasted Or anywa, what flack wanted things high to settle their own feasible.

GETTING it all together

Outcher and the Tarties who were still in his has seen in saved in Audjoin brought by the burlenders, who said soching about the Apaches being there. We said the law of the said the s

Walter paid for all damages to the bor, and average to the second average of the second average of the second average to the bor.

Water paid me a home of \$1,000 for actions that were "above and-heyond the call of duty."

Right now, a construction orew is putting the finishing touches on an addition to Moore's twize City, so the Song days in the desert and all the fighting were worth it.

Naturally, VV dislat care to settle down in Phoenix with a swalf-time motorcycle swechaetic like every now and then, when after has time off between pictures, we get together for motorcycling and silver phasaset must meet meet age.

Okas Now what about your second

loses? How was be different?
"Well: Hugh was a specialist in off-heat
was. Not anything wav-out, though, I
mean, oral sex. Hugh was an expert at
that and he taught me to be urord at it.

What else do you consider to be offliest sex?

"Well much, off-beat isset the right word Maybe it would be better to say that High was clover augenous when it came to things like positions, and armoul places to have sex. Like High enoved making lose with me on top, or with him entering one from the rear. Ms. bushand doesn't care, for those positions. With him it's almost always the 'standard position's

And High liked to be during the liked to esake love in places like for example on the brach one attension in broad durlight with a lot of people around. "How did you manage that?"

We just julled a blasket over so brow about the wast down, then he shipped off the bottom half of my blain, and took off by commit then we pretended on were just perting. Vid we, well as made it We couldn't more very much, of course but it was so certifing being them with other prophy, not the blas of maxlu, getting cought, that added something to it that dinger.

What other unional places did you make love?

Oh, at a party more in a bedroom that we didn't lock in a mose - up is the balenty in a parking lot when we went to pick up the car after we went out.... lots of places.

Of course, we didn't always do it that was most now und then. The spootanets was good for extra fricks, too.

You husband doesn't like making love in annual places, then?

No Eigness I'd have to say he's not sees magniferer. Has your extramarital see, had any

effect—good or bad—on vota sexrelationship with your hasband? No Eve tried hard to keep our sex the same as it was before like Chaven't donesed bing to had with him that I ve never

same as it was before. Ifte I haven I done anothing in ball with him that I we never close before that would make him wasperson. I approxe had I choult want to change the way be makes love to me, asswar. Life I said her soon in the onhis own was and I don't - out him to be as of deferent. But I do word different kinds of sea—from different men.

interested in sex with my lovers When did you first have an affair?

How did you decide that you were justified in skeping around? "That's easy. I'll never lorget that. My

husband had hundly been home one entire dus and night for about three weeks, and I was going out of my mind to sex. On the first night be was able to come home and skep with on 1 all but beared him to maire love to use, but he was exhausted And important

I guess it was partly out of revenue and partly put of a pure need for sex, but that might-I scoose at was about midnight-I ant up, and dressed, took the cur and dense into lown to a cocktail loonire that's a well-known pickus soot I'd never done servibing like that in my life nex-r gone jeto a har alone. I say in the car for maybe a half-lactor, trying to to get up cisconch reserves to go through with # Finally, I Mark Sch well uaitieht went in Within five minutes a vising man was burying me drinks. He was not set nedicions instrumental no better or worse in heil than anyone else no better looking or more sinteresting. Not I couldn't have tured less - he was a male leads and that's

all wanted World you say it was a good sexual

experience this first time?

'And since they

I had a counte of organis and that's all I wanted at the time. He could have been any man never saw him amon. neve him a phony name and telephone sumber. That was that

ELL, that first time I chested on my husband was like losing your virginity-after that it's easy. Now Em more selective and more careful. I ve had a dozen lovers in the past three years or so and enjoyed mount had a wondorful time for the most part, and with no minus of marriage

Is your husband suspicious? I mean, when was the last time he much love to

He doesn't support he's an weamen on in making mones in wheeling-and dealing that he hardly knows I in alive Maybe once a month he'll wake up in the middle of the night with an erection and well over on top of me and base himself a middle. He doesn't even remember the next morning 4 couple of times I've mentioned it just to embarrass him So maybe that night or the next night be'll come home early-which for him means name or ten o'clock-and we make love the acorones it won't happen again that he'll come home early more often and ... well it's the same old routine all OWNER MEASURE

'And no be isn't suspicious. Figuess he figures that women alon't need sex as much as men do. Either that or he docun't really give a down; as long as he's making

You've never talked at own with him told him that you wanted him in the harderson instead of at the bank I tried to when I hadn't cheated on bion set but felt was on the brink 4.8 1 not was the old. I'm timel, let's talk about it tomorrow excuse After a comple of times I got mad. Then warted sleeping around. Now? Well it's too late. If I told him I'd been cheating - him, he'd divorce me. He's not exactly the kind of man whold understand spenething like that And musbe I'm partly at fault I like that money tree Examene We live yout!

784 4 a comment from blands with innovent brown a varithat buth

MAR, THE MAURAUDER?

* "The Ben Lion They Guide's GIL" in the Pelmisry MALIS, shows very well the cause of Marin treatme—Man himself, who insists on blaming his treaties on other factors.

Balmon fighermen in Alexies bismed the brown beer for peer extches; investigation proved the fighermen to be at fault.

Another stery in the Pelevotry issue—"Egypholl Care Gouble Year Insurance Coots"—blomes are duringe on the manufacturer. But I think dumpe in the mainly in little driving. Serin drivers could drive a glass vehicle for two years and still mointain it in good condition. But most drivers are the thin Chotmati Zoo gerilla whe was findly given a canvanted as the only "key" he couldn't kerak.

William F. Bowen Cinelmati, Ohio

We agree in part, Bill But we think that auto manufacturers should build better cars, if only to protect the idiots from themselves.—The Edisors

YO-HO-HO

* I think that the "water mensters" those people seld they spotted in "Armerica's Strangs Water Mescaters" (MAAE, March) search water nonstern, all right, But they yours "fire water" monsters. Those fulls should stey away from the jelos.

Zoch Dupoul M.V.C.

Maybe the water monsters are on the juice and are seeing people —The Editors

TEAR-JERKER DEPT.

 So there you go again, rapping the auto repair people. I'm in the business and, yeah, I consulmatly engage in what you call "one repair upps" ("26 Cir. Repair Opps." ("26 Cir. Repair Opps." 'I' of shares to doubt, with the outrappeously high prices i'm sharped for parts by Ostroit, with nalary dentantly guing up constantly, and with all my other overhead costs rising besides. I've gnt to moles a Svingtes.

> Name and address withhold by request

Oddly enough, we aren't able to work up too much sympathy for garage owners who are pleading powerty to justify their dishonesty. A benk robber, burgler or mugger can do the same thing. We wonder what our auto-driving readers think.—The Edisors.

ALL'S FAIR

"But not without downt sharing," Blagen vowed, "You'll never get one down there again until we really know what the half we're doing."

"What about rell outlin the morning?" Cherrhers added, "We can't just my pror Billings and the others turned into anothe and want up the store pine!"

"Suppose they find the door unturked?" Hagon said "That way they're bound to figure the fellows smoothed into the empound, maybe stowed away on a truck or something, got out that way, it's hum does often about ?"

done often enough."
"Not here," Poorbecathy said gloomity
"Buides, how do we unlock the door? The link is on the other side and even a prolike you can't couch a machanism through an inch of stud.

"Yau are looking," the may arraival components said proudly, "at a mon who routinely succeeded in scamming himself into an oversight bag. That arindow is a land pre-circh."

Millier could basely betteve his eyes when, using one of the bestle on a leafter. Hagers clumbwed up and wrighted through the night-inch window slic with the case of a ground entite, dropping ribrelly to the ground.

Ranking on the upper bunk, Mither merously workend Faguer erard toward the said door on his bonds and knoss, drupping flat submarver the rowing marchights swept the harracits. A moment later, they head faint metaller marketing sounds from the other side of the door. It opened and Hages singual reminder, groung "Absolutery nothing," he discissed: "You should have men the term I got our of a pullowed remain out II got our of a pullowed remain on the

hittiam of Lake Seis."

Unnoticed by the others, Jack Chambers had secuded his face and hands with dirt "Won't be enough," he mid "The scum have to be convinced that Billings and the colors actually reached the compound."

"How?" Miller select. "I'm going to creom's guard! They'll

third the secanous did it. Bufore they could talk him out of st Chambers was through the door, vanishing wraith-like into the night. The others waited tensory as the minutes ticked by, expecting to hanc the stutter of antomatic wempons, Then Chambers was buck, a Lugar pietol and an officer's coronical dagger thrust through his belt "Get me that creep Oberleuteant Schmidt," he glosted "Right outside the mrus half Unstard sever know what hit

Look than two hours holer, every seren m the came started howling at once

The next week was one of the most grueling of Lew Miller's life Like the selar men in the barracks, he was grilled fur hours on end, noise, without sleep for as much as a day and a half at a time while teams of interrogators tried to break the story the POW's had agreed upon Finally, dazed with wentiness, the words bucame meaningless even to himself, as if someone were playing a ministure phonograph record inside his hand

"I had no idea Colonel Biltings was planning a break No, I didn't hear then luove the harracks Who nglocked the deor? How should I know? I wasn't asked to take part in the escupe Wouldn't be here if - had . . Why not? High, I good Calonel Billings just didn't the my looks"

To his surprise, the incorngentions never included physical torture. As this stage of the war -- an Allied m - - 4
France expected momenturity-some prison camp commandants were careful to awaid new actions that might put them in it war crimes docket if Germany lest.

At last, the questioning ended immediately afterward, the entire guard force of the camp was replaced, the former initers being shipped en marse to the communitant had decided someone under his command had been bribed to smuggin the occupies out of the compound

Intitior and his friends sank back into the droncy contine of POW life-eating the watery some and ersetz bread that was their only food, playing endiese games of IOU police with cards so stated and cremed that most of their were identifiable by their backs. The first break in the monotony was the arrival, early in March, of Cerporal Laroy Krajewski. An incredibly strong grant of a man, with hands like snow shovels. Krajewski was a former coal miner from Connellsvitle, Penesylvania During a mass break from Studen 16, less than a week earlier, he had everturned a woeden guard tower with his bare hands, enabling more than a dozen POW's to escape Caught two days later m the Mohamian Perest, he laid out eight Gremm suidiers before being subdeed.

to gove the "final wordlet" on fillings' turned "Anyone damb amough to go is those," he said after inspecting the orumbied shaft, "airseries to die with his mouth full of dirt. It'd be easier to secrette boild an airplane and fly out?"

But the time came when like it or not. Sum Billings' tunnel had to be send After midnight on August 3, they were awakened by guards, who shoved a man wearing a filthy, smoke-stained RAF Bying sait into the barracks "Meet Wing Commander Maltory, an SS corporal said with a sarcasts: lough "Don't become too friendly We're only knoping him here until they send a truck up from Boutlinger His fifthy bumber crashed in the next valley.

After multered greatings to tim newcomer, the men in the barracks termin ever and tried to go back to sleep. Tlmy would have if he hadn't ashed in a

ploading verse

"Would one of you gordnmen please kild me? I hack the courses to do the job myself, I'm afraid." They all set up biles Pearlworthy lit a coulde, a serious infraction of the cump rules after 2100 hours 'Dentril' he named when he got a closer look at "Wing Communder Malfory:

"You know who I am?" he was asked bis eyes stunned, Fearlworthy nodded.

You toured my Spitfire base in '41." "One of at will simply have to hill

me, the newcomer said in despair He told his stor in clipped phrams "Wing Commander Maldory" was actually Sir Roper Ouff, one of Britain's three top civilian experts = aerial weeponey, a key figure in the development of mass saturation-bombing techniques. "I'm here out of stapidity," the prey-based, wency-faced Cleft said with bitter self-reproach "As far as anyone in London knows, I'm on a month's holiday at my bunting lodge in the north of Scotland Dector ordered it Gall bladder Left orders I wasn't to be bothered under new circumstances. Trouble is, two nights ago, we hit the underground rocket movembly works in Munich. The planes used a special deep penetration bomb I devieed for the Air Ministry. Wasted to see if it had really done the job. I'm absolutely forbidden to go on combat musicious, of course, but I'd chested before and gotten away with it Old Hugh Mallory—we went to Cambridge teaction—was leading a follow-up recon formation over the target area. Talked him into taking me along N 4 even the other crewmen on the Lancuater know who I was. We'd taken agrial photographs and were heading buck when this wretch of an Me-109 zoomed out of nowhere and shet us us God knows why, but I was the only one who came out of the crash alive Managed to pull old Hugh from the wreckage before it burns completely Poor fellow was dead. Knew full well the Jurries would sell Eva Braun into slavery to get their hunds on me, so I changed chestus with Hugh, put on his identity fines. Now you'll have to kill me Nothing for it.

"Now take it ensy," Just Chemines mid Why do you want to die?"

"I have m my band the dates, targets and flight putterns of two dome NAF and

American arr raids schoduled for the sent 30 to 40 days. Mass strikes on ball boaring factories, V-I founding setes, everything you can think of. Once the Germana discover who I am, they're certain to terture me, hearn everything they con. Nover enjoyed physical per- Vary no-British of me, I'm serry to say No. I'll talk. Not a shred of doubt in my mind. And that means thousands of mon will 4m when the Germans interchet our Towns actions

"And there's more, another matter that I con't even mertion

"Maybe they won't rective you seen't bloklory," Hagen suggested bogsfelly

MILES Poorleverthy should his bead "Not a prayer, Once they have - - regular POW camp, he'll to put through the routine works by Jerry Intelligence The . have memorized photographs a mon like Sir Roger, just case they ever run into this kind of a windfall. The captule's easer hands reached behind her, sought the brassiere's

Then Jack Chambers uttered a soft, strangled berely sudible cough The loughter on the other side of the bolos

"Who is there?" the Luftwaffe captain neked sharply, reaching toward his holstered sidearm

"It's just a chicken or something," his friend said. "Come, Don, get out of those ponties.

Miller drew his Lugar, stood eract and shot the captain between the eyes. Blood sourcian from his shattered forehead, he feti across the nearly naked blonde's tissome body. Female screams ringing in his ears. Miller swiveled about sest to time to me Jack Chambers follow through his swing with a cleanly piece of oaken plank that sent the Nazi licutement over the edge of the haviolt to the been floor below. But somehow, the Nazi recovered and, his head bloody, he staggered out through the barn door

By the time Miller reached the doorway, the Nazi had roared off in the touring car. "Son of a raving bitch!" the American howled He knew that an hour offer the Gorman sounded the shrem they would all be dead or captured

MEN Mins Pearly orthy reshed post ham. 1'll hamfle at " the former track star we liked

As the car descended the twester read holow the barn, Miles Penrhvorthy dashed cross-country through the fields. In his hand was the ceremonial dagger Chambers had stolen back at the stalag The Englishman vaulted ludges and drainage ditches like a gazelle, long legs moving so fast that they were blurred. He was nearly a mile from the bace when he plunged down a steep bluff above the rund-just as the Gorman hit the brakes to negotiate a sharp curve, only a few feet AWEY

With the last of his strength, Penriworthy dived into the front sent. plunging the dagger into the German's throat. The car veered off the road, rattled down a billside, overturned twice, finally coming to crashing rest against the trush of a massive oak tree

Hours later, a squad of Wehrmacht troops found Pearlworths lying in a thicket a number of a mile from the weech. Both his loss were broken. You may not know it," the Englishman said in a pairthrottled voice as he stared up into rifle mazzles. "but you nearly witnessed an historic event. Homestly believe I was the first man to break the four-minute mile (Bloody shame I'M survey be able to prove

After hinding and gagging the two aperified German pirls with their own clothing, the three surviving escapeex had flurried to the scene of the car crash. All thus had found was the dead Nazi officer Miles Pearlworthy had already dregged himself set a the woods "He has to be around someption!" said

the buffled Jack Chambers

They shouted the Englishman's name again and again, not renticing that Pearlworthy had temporarily passed out from the pain of his shattered logs. No good," Lew Milter finally said. "rend knows who heard that car hit the true We'd better move on while we still

For the next five days, the tree lived like hunted animals. Travelling only at night, this spent the sushit hours among the dark for trees of central Germany. Their chief source of food was rotting potators, torn from the earth of backwoods farms. Since It was still summer, they had hoped to find wild burries and mers, but few were available. At this stage of the war-when the German civitian population was getting its first real taste of starvation-known patches of natural food had lone since been rayaned by teams nent out by local villages. Several times they barely escaped detection by such groups of formging presents The only time they found an intact foul

supply led to yet another disaster Crossing a narrow spar of mountains north of Fulia, they stumbied upon a mendow dark with blueherries It was sources, when they soundly went into #I owne year hiding hunger overcame

Caution

"Yes two get buck in the treet, Chambers said. Who's going to pay am attention to one man picking berries, even if there's anybody around? Another day wethout nating and you'll have to bury

Despurate, they took the chance-and were soon to regret it Chambers had barely filled his greasy fatigue cap with freit when, seemingly zooming out of nowhere, a single-engine Junkers observation plane swept over the meadow at treaton level. The aircraft pulled up sharply, banked to the south "That tore it!" grouned Law

Miller

THE three POW's fled higher and higher into the mountains, keeping to the most heavily would areas. Two hours after the Junkers' appearance, they know that Chambers had been identified as an escaped presoner. Lying on their belties stop a ridge, they saw a column of Nazi trucks conving up a dirt road miles below They halted, disgorging dozens of riftsbearing men in gray-green uniforms. The soldiers sprend out in a thin skirmish line. and moved forward

At least we've got a decest head-start." Miller said. Maybe we can find a place to he low until they've passed on

They climbud on, crossed a sparsely wooded peak entered a stretch of door woods with high grante cliffs on either side "Dunn it, if we only had a map?" Chambers said "This moks like a non-but you can't ever be sure."

Dask was closing in when they came un asonat a shoer rock walt stabbing nearly 700 feet into the sky Equally steep cliff faces lossened on both sides. "We're hexuel en. Chambers said gloomity. "And if we backtrack, we'll run into the Krauts for sure Can't be more than half an hour behind us. Only one thing to do climb out of hore."

"You're mits." Hanne total the exalpinist in an appalled voice. "I get distra on high curbs!

"Not you and Lew," Chambers said "Without ropes and tools, neither of year could do at that the climb as a cinch for me And while I'm up there, the Krauts won't be looking at anybody else. That spotter plane saw one man. How do they know we didn't all split up and head in different directions after that shoot-out to the barn? Besides, Eve a good chance of making it on my own

A plan was quickly desired. These scooped out two troughs in a copie of trees at the edge of the canyon. Millur and Mance lay down in the holes. Then Chambers covered both of them with none needles, having only their faces exposed "He dark soon," Chambers said "You'll be able to slip out then So long

The two hidden men were helpless witnesses to what followed. They watched Chambers start up the cliff face, bathed so the red glow of the dying sen. He was twothirds of the way to the top, clambering from handhold to handhold like a monkey, when the Nazi force entered the blind canyon An advancing German passed so close to the concentral Americans that a heavy black boot almost stepped on Miller's head

But Chambers had been right. Noon of the troops said the slightest attention to the ground Every eye was following the POW's porsious course up the face of the cliff

"Come down!" A Nazi officer bellowed through a lasthern

When the warming was ignored, the soldiers opened fire with their rifles. Jack Chambers was within six feet of the top of the cliff when a bullet caught him in the back His hody plammeted earthward

Chambers' sacrifice gove Miller and Hopen another ticket to survival, since the Nazis, thinking the other POW's helf made it over the mountain, withdrew Under cover of the gathering darkness, they made their way back through the caryon and resumed the journey ments &

The next two weeks were, forever after, a desperate, confused blue in Lew Miller's mind. He and Hager slipped through Nazi Germany like a team of ghosts, time after time avoiding capture by near-miracles They stowed away on freight trains and burne canals, twice stole cars, drove them until they can out of gas, continuing on foot Often Milter-wearing the dead Luftwaffe captains uniform would risk visits to small toward to buy foul, white Hagen remained hidden on the countryside

But finally—just before down on August 1" they sensked across the border into German-occupied Denmurk. The most dangerous phase of the escape now confronted them. "Denmark has one of the best Mexissance organizations is For one," Milter anid after they had found thouse on the outside test house on the outside test of Flys, "Means the Kriest security setup is 10 times to keep the security setup is 10 times. We'll review need to see the new We'll review make at the Sensitive without help."

"But how do we contact the Underground"

"Only one way I can think of And I

hope it doesn't get me killed. That night, wearing the capitalist austicers. effentlement from since this

But this knowledge is morely the book enumerment bufors they can be said to know how to make love. To be really successful-and certainly if they are going to hard my advice and approach coulsummon of lovemaking with the extention of making it as perfect as possible-they must make oute a close study of their wen, and particularly of their partner's mactions to the various mimulation

trecominues.

Dr. William Mastury and his associate, fifes Virginia Johnson, have been approving out experiments suder laboratory conditions for more than ten years. Their subjects have been volunteers, carefully chosen according to certain orders, from all age-groups and social strate. They have trained these causeles to make love under observation as naturally as they would se the privacy of their hudraouss. In 1966 Dr Manters and Mrs. Johnson published their findings at the end of eleven years of tests in a report called Human Season Response In my way this is the most significant study in sexual behavior to have been made up to now Their discoveries, hesides exploding more of the myths which surround sexual resources. have also opened up usany roads which find to the letter understanding of second buhavior. Not only that, but if many of short findings were used as a base for the inchaigues of lovemaking, there can be no doubt that these techniques would be considerably unhanced results-wise. I shall cartainty use some of their findings as a fundation is some of my brief accepted which follow

THE ROCASTS

Eugryone who has taken even the smallest amount of once with their lovertaking knows, I suppose, that when a woman's breast are cursued, and particularly when the nipples are concentrated on the nipples swell and hurden, and become erect in the same way that the clientic and means do. The reason for this is that the norwes of the bennet are concentrated with the woman's sexual survous system, the effect of which is twofull: is calls forth montal-like responses in the a option themselves, and also makes it possible for the broasts to convey a manager of spread excitors out to the main DE OFGROS

Their oppration, I bulieve, is to a very large extent psychological. If a weman's sipples are caresood by her partner's finger and thumb or his mouth, this is a definite sound approach. She knows it, and this heightens her responses. There are a number of women who can withhold the erection of the nipples if an attempt is made to caress them by a man who, for some reason or another, at sexually summerant to those This has an analogy in the man who is the object of stimulation by a most or women for whom he has no

musal fluire et ell; a strongly intercesses man who finds homoseness behavior thoroughly disputing very rarely responds with erections even if he pours is annorthy stimulated by a homosomesi-

A.S. I shall be suphisting better—I have already briefly mentioned it before—it m, m my yew preferable to begin foreglay not with direct stimulation of the chiteria. which is both hard to find in very many come and also canable of cassing a good doal of pain if stimulated dry, but with stimulation of other of the sensitive torogenous) zones. With the encuetion of the entrance-row of the vamos and the efiteria, the breaste are usually a woman's most highly sensites none Even customer throw in the hands is sufficient to cause in most women a phosparable response. So if farontay bonins at the breasts, the clisoric is most likely to become erect in loss time. than if any other of the oregonous name wore stimulated.

Platerally equation, as with the some and chitorie, brions about no recessor in the tere of the nippins. This, of conces, se brought about by a similar incust of blood as so the case of the nears and chitoris Masters and Johnson have discovered that large nipples do not incresse in tale proportionately with small nipping; in other words, small nignite increase more on senct-ease relation to their relaxed-size than do large nipples it follows, too, that the woman with large nipples does not have a more intense response than the woman with small nimples. In fact, the woman with small nippies can have an intensity of response of which the largenippled woman can never be capable. Mag, therefore, who look for large nipples in the botist that they will find a highly passionate nature, ure detudion Homes well tree.

Once the nimbs how become erect, as a rule the- stay erect until the wanten has come off But again at is not possible to generalize, for though a woman may become progressively excited until size requires the pents to be put into her and counting rapidly brought to a climan, m quite a few women the nimbes may lout their seaction. A number of women have sentified to this, white others have said that they lose apple-erection if direct stimulation is withdrawn Some of them wuman find that once nipple erection has been lost, it carned by regained even under export direct stimulation. They loss nothing by this, however, for the strendstion of admr or agencies some makes up for the lost monations in the

throadly speaking, however, in the meanth of womes nigota-erection done remain until after the woman has come off. The subsidence is not always apparent, because the smoots, which also smelts during excitement, subsides first and though the nimple may be quite soft, it reinses much more slowly than the aresta,

and somes to be still erect Before I go on to consider the suspenses.

to sexual exchement of the varsous imitividual parts of the sexual apparatus of women at will be useful to describe briefly two different acts of reactions which de-nounce in oil sensially excited woises-though, agent, with verying down of affactiveness. They are:

THE ACTION OF MUSCLES

In the final phase of sexual excitement, there is scarcely a moscle in the body that m not involved, some considerably so, some only very slightly, in the response to son. Even in the middle phone of excusement, some of the most unlikely muscles become caught up in the peneral response to stimulation and mountery lensuon.

The reaction of the susucles has omoutstanding characteristic-tightenian: though some of them have a characteristic tightening afternoting with relaxing, such muscine being those most clearly mesocioned with the physical mechanics of armann. I shall be deating with these particular muscles in a little more detail nor, but they are for the most mart, those which surressed the vaccina.

Tensing of the muscles, of course, we not only the accompanyment of mounting sensed tension, and relief from that tension. Feer causes it, for example The men with a lad had for heights, who finds himself on a narrow cidge with a draw of tens of fact below him, becomes petrified by his fear of failing to his death. "Petrified," "turned to stone." He becomes rigid, unable to move a limb Pain, especially sudden pain, more often then not, but the same effect.

This tensong of the resectes as, for the most part, automatic, involuntary and обен инсормения. Ипсорясівня завеля за cortainly the reaction to emotional stress of the type which causes headaches. The handactes are, in fact, brought on by the menting of the muscles acound the upput part of the spine and in the more.

In connection with arxied excelement, one group of muscles which are encounciously tightened are those in the above, it is this which is the first course of the "graping for breath" which is a universal characteristic of both mea and wemen as they become increasingly sessably stimulated, even if they are lying absolutely still and are submitting to the carenes of the partner. Men, as a whole, tend to gasp more vehicitently than women, and there has previously been the notion that he does so because his thrusting movements during the final phase of lovemaking constitute comporatively violent exercise, and though one might not know the cause of the quicker-than-normal breathing which is brought on by any form of vigorous physical esercise, I don't suppose that there was anyone who was unaware of the shortmen of breath or who did um recognize it as an invariable accompaniment to vigorous physical

If we had carried out only the simplimit of researches, we might have discovered lung before Musters and Johnson brought it home to us, that the man breathes more doubly long before he embarks on the final, regorous phone of intercourse; that in fact, if he is marturbated by a partner he manifests the same gasping for bronth after the point-of-no-recern has been reached and until he has finished coming

off, yet he has restrained absolutely immobile himself Hed we been at all observant we would have noticed that those women who lie on their backs and make absolutely no physical response at all to their partner's thrusting movements, also goop for breath as they come off. We might even have noticed that if we indulne unraches with a protonged session of the—say an hour or an hour and a half and are the happy victims of expect nimulation, after about half an hour we have increasing difficulty in breathing through our nows and have to brenthe through our mouths to avoid a sensation of sufficating Some couples-highly arried and prayeonate whose coming aff sensations are almost invariable interne-have been observed barior their teeth at the very peak of coming off, which undicates that a strong doore of involuntary muscle tension is present, nonce it is clear that the buring of feetle is not the notural reaction at mamonts of great conscious ecetasy, and while, in addition, in order to bare the most the menacips of the fine estant be beyond.

However, the tenning of these particular muncles in the chost which comme! both the man and the woman to breathe dornly. is not the only cause of the gasping. The meend unovoidable reaction to sexual eximulation is the concentration of blood in various parts of the healy. The obvious mombers which respond in this way are the number of both partners, the woman's chiteris and outer and more vaginal lips, and the man's point, the chiteris and press becoming so engorged with a communication of blood that they become quote rigid as well as awalian in was, and the vaginal lips so enlarged, though they remain soft, that the difference between their relaxed and engagged states in visitate and their swelling recognizable to the tonich.

By their remarches into blood concentration Masters and Johnson made the discovery of other areas of the body which are subject to this phenomeoan They found that during the early stages of a woman's remonne - sexual stimulation the womb raises itself again. This was one of the realty original discoveries of to whole research project; before Manuera and Johnson noted at was unknown, flince there are no mescles surrounding the wamb : hough those are muscles built unto it-this movement has created a puzzle Mustner and Johnson's own explanation, or rather suggested explanation, is that it is brought about by a concentration of blood in the figureents that hold the womb in place, that the smalling of the ligaments caused by this concentration of blood shortens the ligaments, and this shortening has the effect of lifting the womb. They could not prove that this is what happens because no method of observing the leasements has ver tuen devices, and consequently a number of emicent gynacologists report their supported explanation. Their own suggestion was that me the woman incomes there and more sexually excited, the muscles in her abdomen and polysic arone tighten and this tightening range the wouth. After the hos come off, the treaches

rulas, thus allowing the womb to cature to its normal position

Whether or not the nomb-ligaritests duexperience a connectization of blood, the increase is the same of the woman's broads—but her nipphs only—is the result of an invassed flow of blood in the bounts as a consequence of general assumi simulation of the woman.

I shall be discussing both the concentration of blood and the tighteen of muschs much more specifically when I come to duel with the assual response of infividual organs, the first of which are the officers and vasion.

THE RESPONSE OF THE CLITORIS AND VAGINA

The citoris and vagens are the women's two stayer sessed organs, and the citteris is the women's most statetive oragenous from

First let us consider what happens physically to the cliteris when it is stimulated. To do this it a necessary for one to describe briefly how the cliteria is constructed and its see

It is by all companisons, a rany organ. It is have a calculated that mit is reliased state it is reliased state it is reliased state it is reliased state it is average length in about one-lifth of an inch. There are, however, so many variations in some as there are of the game variations in some as there are of the game from mean to man. Some cilieroism are so large, that when they are erect they procrude from the onser vegating lips to all approximations like the head of a ministery mean. The average cilizoris, however, is no small to be easily some, were when areas, and is located usually only with difficulty.

The citeria, then, like the pense, has a shaft and a head. The shaft remains inhedition in the six and only the boad proctudes. When the seeman is not assuably section, this hoad is covered by a hoad of skin, which, when exection takes place, stips hand, just this the foreskin of the uncircumstand male, and enposes the head.

Other obmackwistes of the pure relationship the chiera are the apongy executing teams, which filts with blood is exceeded, and the mass of the pure causes storogathern, thus easiering the clients to become stiff, like pure; and the mass of merous, concentrated have more diseasely, then no encounterated have more diseasely, then no support of the woman's assual approach account of the woman's assual approach account of the woman's assual nervous systems, under suntained direct stimulation bring about the woman's organic

The chloris is sited at the upper point of the soner vaginal lips, which cover it Briow it is the opening of the weethra-the take by which the bludder as emptical of uring halow which again as the vaginal entrance. From the chitoris to the uppur rem of the vaginal entrance, fronting the public bons, is a short steep of flesh covered with the special membranes skin which fines the vagona, and so surrour to the mumbrane covering the hand of the menn This stem has no anatomical name so far ns I can discover, and for the sake of convenience, I call it the vagenal ritigo, since it is necessary to refer to it frequently in our consideration of the function of the vagona and clitteris.

Packed full of mews though it is, the

stitutulation than down the partie not only to bring it to excitose, but to build up the responses in the plateau phase and threadhers like the plateau phase and threadhers like the plateau phase and threadhers like the plateau phase and stitute is but has been to the total the stitute is hard to be hosted, and this, as more causes than not, as quite a job, it wends some a but of twee and worsy if the woman would take her has been a first or the total of the total threadhers.

Even when he has becated it, he may not he able to swear that he can feel st, but if he gently rubs the anot indicated by his wife, after some misutes he will bucome nowers of a tony hard ball, about the size of a small poa, under his finger. You will monit that earlier on I advocated that the man should not bugin his foreplay with direct stimulation of the citorie, but should induce its erection and briss the flurtholin's inbricating glands into action by stimulating the breasts and other eragenous xones, on the grounds that direct stimulation can come extreme discomfort, puchaps to the extent of killing the woman's duire altagether, if he attenuate it before some degree of erection and particularly the flow of lubricating fluid have been achieved. Really expert numerical many accuracy receive super-numerically have an associate effect on the cliteria, shough from women to women, and in the same women from encusion to occasion, more or less temp will be required to bring about chicasi erection.

Now, the salt thing about the observe in that the bend prosendus from the hood soly during the first, or excuences, phone of attimulation Masters and Johnson discovered by observation that when the phases phase was reached, the citoria, while remaning fully seed, drews bank which the hood and skeys theme until after she hod come off. This will access for this complaint of many seen in the post that they have been sended to maintain them have been sended to maintain them having found if and careemed it for a turn, they have that it mem it has best into the phase of the sended in the sended to the send that the send that the send that the send that the send the best the sended to the sended to the send that the send the best the send that the send that the send the best the send that the sen

erection.

Though the woman form all, or mean, of her aroused semestors when direct simulation stops, the erected and swother actions and supplies remains erect and the two sets of vaginal lips swaller, despite the fact that they are not under simulation from physical or psychological causes. In fast, as very sex franched will self you, after the woman comes off she goes on feeling organises meant of the properties of the post of the

for much for the citoris and as responses, We will tare now to the other chief part of the woman's second appearable—the segme

THE sugmon—o as a Latin word meaning shooth—is a kind of herrie-like tube point up is jointle the section at a lating of herrie-like interpretation of the property of the section of the

function as se elementate that mercus us the purses. The first hind of corresponders in herospit about he fire fact that, being only, 3 inches long, whereas practically, and length of penss that guest into it will be harveen an inch and four or five incluslenges, it has to serrich longway to accommodate the pense it is also capather of expanding in circumference so as to take now also followed any states are taken as well of almost any states.

Even before the means is put forth the original, however, the vaginal encenance or some from its normal relaxed state, the some from its normal relaxed state, the socretain being actually counsel, and though the sections being actually counsel, and though the sections of the vaginal does not react as originally only when made to lot so by the general only when made to lot so by the general properties of the tells empoweds units, and the far end, it states one is mit-flower to the far end, it states one is mit-flower to the far end, it states one is mit-flower.

experience. The first half of the vaginal is length in supplied with nerves and is surrose shall be uncer walls of swooth music Masters and Johnson have called this part of the vaginal the organic platforms, because if the control of the control

The risk of the veginal sestrance is as well supplied with merves as is the clitoris. and the freewest of the man's penes, and is, sharefore, a highly important progenous RONG It is also surrounded by - muscle which the woman can learn to omrate. It m, however, by way of being what m h nown as an involuntary muscle; that is to my, at times it contracts and relates at with and nothing that the woman can do will ston these movements. In a very large mumber of women they occur as she comes off, in the same way and in such a pronounced fashion that the muscles surrounding the male genital area contract and relax to force the semen out of the points when the man comes off. In quite a number of women, however, they are so foint that they cannot be felt by the pones, and, according to some women, not even to the woman themselves

The entrance to the vagons is probested by two small folks of flesh known as the sense; (or mesor or issuer lips, while the sense to respect to the variety and the colors are protected by harper folks of flesh caleful two other terms also or greatest yes. The covering of the human lips in the special membrane that himse the vagons, accept that it is not corregated, while the outer covering of the entry of the covering of the c

Becase of its expanding potential the vagena does not have to be stimulated to enlargement in order to admit the pens. Though its delicat for a man to get his Though its delicated for a man to get his force in the pension into an enrossed vagina, it can be done provided the pines is well hebricated for one more his pens backwards and forwards, too, be the assial way and the freedom of the each will be treng hars off

PRIMALE ORGANIA

The secretions produced by coming off is both men and women defy description; and such is the effect of them on the physical awareness at the very peak of the chimax, that it is extremely difficult for either the man or the woman to describe precisely how and when the preasure sunsations high, how they develop and in which worts of the anatomy they develop On the other hand, thanks to the Masters and Johnson researches, it is now nomible te say how various parts of the anatomy physically during react ergnom-something which could not be done hofore except in a very superficial

Last us consider first the women's physical reactions; in other words, let us me how various parts of the barky behave mules the sequence of organises consistons.

An sexual accelement trees the citizent neitiges The diagree of an Integration of integration of

HE citiers, which is compound a servicile tensor, like the rispites and the most pens, is enlarged by the inflow of blood as response to situatiation, for header being outproped with a highly sensitive services system, it has a manual pension of the pension is exceeded, set the worknown is exceeded, set the blood will research trapped on the citients.

Similarly, within a short time of the woman buginning to feel sensations of annual arouses), the cases vaginal lays smell—also classed by the concentration of bloom and reach fleels maximum save before the plateau phone is reached. The innex leps also genely increase in sea during the excitement phase in some during the excitement phase in some warms they swell so much that their

some during the excitement phase. In some wanter they swell so much that their thickness adds almost half an inch to the height of the vagons before it is stretched by the panis.

The physical changers, which take place in the wagars bug in the two-thieles of the harrol. Inchest from the current form the critical and the properties of the vagars expanded in all ways. Lengthways: Lincreases by one to two inches, and in which he two of these tenses. Its relaxed preparations. Them changes have coere about by the end of the encietions place.

During the placeau phose, it is the some of the third of the vagins amenest to the entrance to change. It is this part of the vagins, it will be recarbled, then Massacra and Johnson trafer to as the "organisate photorim" includes a time to a the "organisate photorim" includes it in the part of whe vagins most sensitive to organize most act the vagins dear risk or the vagins and the vagins of the vagins of

The effect of all the foregoing is to

propose the parts of the women's sexual appearance most concerned with the momen's organs for the actual coming off, some time before this obmas of encolement is reached, i.e. by he middle of the actual coming.

the plateau phase everything is ready As the first of the coming-off sensations arrives quite a lot of activity busins. The ornamic platform of the varing-the first third nearest to the entrance-bugins to contract and relax with a definite rhythm, in the same way that the penis experience rhytherical muscular contractions as the serven is expelled during organic. Before the organic is complete the organic platform very rarely makes less than four of these contractions, and can make as many as ten, according to the intensity of the organia These contractions always make themselves known to the woman-like the man's incapability of having an organic without sporting come off in more cases than not, homever, they are not violent enough for the man to be aware of them via his penus, and this is the reason who the man were often has no idea whether or not his paritor has come off

Those rhythmic veginal contractions summ to seark off ometer rhythmic contractions in the words. Assist, they are michin the awareness of the woman, but unlike the organic platform contractions than are not essential for her experience of organetic sensations. Women who have had their whole womb removed in hysterectomy are still capable of coming off In fact, some women have teld ma that after hysterectomy their organeses have tended to be more intense than then were before; which I halieve is the result of the removal of the fear of pregnancy-whether conscious not-allowing the woman to absenton herself to swiving without psychological

PRODUCTIONS INTERPRETATION As the woman approaches organic and during actual coming off itself, the muscles in her chest become more and in one tenne so that she breathes even more heavily than ever. Her beart leats much more quickly too, and thumps against him rib cage Other neuscles also tense and somet to reach their maximum of tension with the first organe-semation. Though the is true of all women, in some the tension, the speed of the pulse and the boothing through the mouth are not strong enough to become known by the man Similarly some women, though by no means all, have an automotic consulsion to make thrusting movements with the privic When the organinonsations are very intense, and in highly sensed women this can be a normal. almost universal experience—the tension of the musclus in the face force thom to make strange grimaces, while the interests veterations feelings at the climes of coming off are a kind of extraordinory smeet pain, which makes them cry out, or moun, or even scream shrilly as though they were being bussen. Other women may be so affected by the organin-meastions that they lose control over their minds and whiteer or shout absorbities of which they are probably ignorant—and would exclusily never dream of using—when they are not amine the inflammer of supreme sexual excitement.

Though, as I have said earlier, I do not think there is a man or woman past, present or future who could describe exactly in words the sensations they feel at coming off, it is, I befieve, possible to describe some of the sensual suspects of the woman's organic experience. Measters to them in their own words whet they felt personally, and from these reports they have been able to make a companite picture of the general physiological reactions to organic experience.

These reactions, they say, and vided in These reactions, they say, and vided more than the properties of the sense of the

TAGE two follows without a pause and seems to be a development of the voluptious sensation radiating from the citieris through the pelvis area. This carrier indefinable voluptiousness is now felt as a flush of warmth that begins in the pelvic area and from there spreads to every part of the body. Almost every woman experience stage two.

When this "suffusion of warmth" seems to have reached every part of the body, there follows a feeling that the vagins and lower part of the pelvis is contracting. This is the beginning of stage three. Almost at once the sensation of contractions gives way to a sensation of thorbbing, which though most intensely felt in the pelvis also pervades the rest of the body.

It is in this third stage of orgamic sensation that the first contractions of the orgamic platform impinge on the woman's averness. Parallel with its are phase is the awareness of the contractions of the womb, and at the same time that both sets of contractions are felt, many women become conscious of feeling the

pulse beating in the vaginal area.

Masters and Johnson, while giving a warning against accepting their figures as anything more than an arbitrary convenience, have devixed an intensity of orgams table. If the woman has only three to live well defined orgamic contractions, they reck on the orgams as a mild one; five origin contractions represent an orgam of warding intensity; while eight to twelve or warding intensity; while eight to twelve well on the constitutes a very increase or according to the constitutes.

The fourth phase of Masters and Johnson's sex sequence they have called the "resolution phase." This is after orgam has reached its peak of sensation and the contractions have finished. The sensations of the resolution phase are of a pleasant afterglow of release from tension.

As the sensations die away—and they do this much more slowly in a woman than in a man—the various parts of the female sexual apparatus which have taken part in the organnic experience begin to return to their normal unstimulated state.

The first organ to return to normal is the organic pialform of the vagina. Within a very short time after the final organic contraction the platform shrinks back to its normal size. The time it takes to do this, however, is generally slightly longer than the time it takes for the collapse of the penis's erection after ejacutation (organi) has finished. (Masters and Johnson put the period of other period of the period o

The shrinkage of the orgasmic platform naturally affects the rest of the vagina which also begins to return to normal. Five to eight minutes clapse, however, before the vagina returns to its normal

With the return of the vagina to its normal size, the womb also gradually falls back into its normal position.

The collapse of the vagina is to a large estent paralleled by the collapse of the inner and outer lips. These organs—vagina, and both acts of lips—return to normal as though to the accompaniment of a canon in music.

AT the same time that the major sex organs are returning to normal, the breasts begin to relax. As I have pointed out earlier, in the orgasmic phase the areola swells so much, and in so doing encroaches on the nipples, that it looks as if the nipples have lost their erection, After orgasm is complete, however, the areola-swelling disappears very quickly, and the nipples have the appearance of having regained erection. The nipples return to normal at a slower rate than the areola, nevertheless they are back to normal long before the swelling of the breasts themselves, caused by the concentration of blood, which can very often still be observed ten minutes after all organnic sensation has ceased.

The last of the major sex organs to return to normal is the clitoris. If the woman does not come off, though all the other parts affected by concentration of blood have returned to normal, the clitoris may still be erect an hour after all sexual stimulation has ceased. FREQUENCY OF LOVEMAKING

I receive on an average of eight letters a week from newly married couples asking me how often it is wise or safe to make lave.

There is no specific advice one can give, for there is probably no other field of human activity in which needs and potential so vary as in this field of sexual activity. Some men are coerced by their sexual apparatus into making love every day, often more than once a day, some are prompted by their desires three or four times a week, others twice or once a week, while a minority once a fortnight, once a month or even less. Women are responsive to the same range of promptings, if left to themselves, but are capable of quite a wide range of adjustment-which men are not-providing psychological difficulties do not intervene.

The most one can say to anyone seeking advice on frequency is that seven times a week is right for those who feel the uree seven times a week, two to five times a week for those who are prompted to make love this often. It is, in fact, practically impossible for anyone, no matter what their sexual nature is, to make love so excessively as to damage themselves. Nature has built into our bodies a number of safe-guards, which come into play as soon as any truly excessive activity is attempted, and forestalls it by preventing the male from functioning as he is required to function in order to make love naturally. No normal man or woman, of whatever category his or her sex drive may be, need be afraid of making love too often

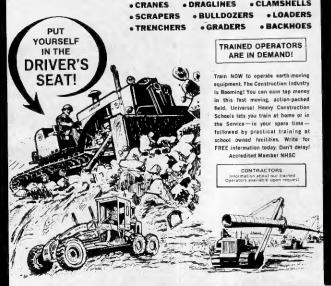

however, introduced the matter here, however, not copie this source, but to that attention to another extremely interesting conclusion reached by Masters and Johnson. They deduce from their studies of a group of elderly subjects that the more frequently one makes love up to the age of 35, the later in life will one be sexually active. They say that it is the fear of failure to achieve erection which is the main reason for men withdrawing from sexual activity in their later years.

It has been pointed out by some commentators on Masters and Johnson's work that the conclusions they have drawn lack a certain validity, chiefly because of the small size of the groups studied. Nevertheless it is conceded that regular sex in the earlier years does generally make satisfactory sex more certain in the sixties and seventies.

I have some statistics of my own that tend to support Masters and Johnson's conclusions. Like them, however, I cannot say that the man who made love seven times a week, given good health, will be making love normally two or three times a month when he is seventy. But it looks to me as though this suggestion has some basis in fact. If anyone feels, as some I know do feel, that life without sex at any age is not to be contemplated, they might probably do worse than see to it when they are younger that no boredom with sex will be allowed to overtake them, and that they will respond to lovemaking as often as their sex urge signals they should. Certainly it can do them no harm; very likely it can do them a lot of good,

Your quick, easy way to spare time earnings, top-pay jobs, or business of your own;

TV-RADIO, ELECTRONICS

Be a skilled technician in America's

fastest growing industry Regardless of your educational background, you can learn the Electronics field of your choice the practical, "hands on" NRI way. The NRI color Catalog, sent to you FREE and without obligation, tells you how you can qualify quickly to be a part of the fastest growing industry in this land. It shows you how you can train at home in your spare time for top-pay positions in industry, in business, or with the government. You'll read how you can get into the exciting field of broadcasting or how you can start a business of your own as a skilled TV-Radio Technician - either part-time or establishing your own full-time shop.

Make \$5 or more per hour starting soon

NRI prepares you quickly to cash in on the boom in Color TV, one of the great money-making fields you can choose with an NRI diploma. TV Technicians are in demand now to keep millions of color sets in working order, NRI is the only school offering home education in Color TV Servicing that includes a color set totally engineered for training purposes. You learn by doing, demonstrating things you read about in "bite-size" texts as you build and use professional lab equipment. Electronics comes alive in a unique, fascinating, easy-to-understand way. In Color TV, the end product is your own high quality set, yours to keep for years of viewing pleasure.

TRAIN WITH THE LEADER Tens of thousands of NRI graduates are proof it is practical to train at home in your spare time. NRI gives you a choice of 12 training programs. Five of them include FCC License preparation. You must pass your FCC License exams or NRI refunds your tuition in full. Decide now to move ahead in Electronics.
